

# WHERE NAVIGATION AND BUSINESS APPLICATIONS COME TOGETHER

## TomTom BRIDGE is a powerful open navigation platform creating the customized services of tomorrow

Get ahead of the game with TomTom BRIDGE. Empower your company's fleet, increase mobile worker performance and reduce costs. As an Android™ navigation platform, BRIDGE also allows you to create innovative customized services – opening a world of possibilities.

## Bringing world-class navigation and business applications together

Create innovative services tailor-made for your unique business needs, via a single device and platform. Help your mobile workers to make informed decisions, take fewer risks, and manage processes on the go –while cutting back on dispatchers' workloads. Increase efficiency, reduce costs, and gain a deeper insight into your business from one connected mobile solution.

## Super-charge your business processes

Move your business faster with TomTom BRIDGE offering you best-in-class software navigation, the latest Maps and award-winning Traffic information. BRIDGE can help future-proof your business, allowing you to integrate all your business applications to create innovative services that will keep you ahead of the competition.

## Easy-access Developer Portal

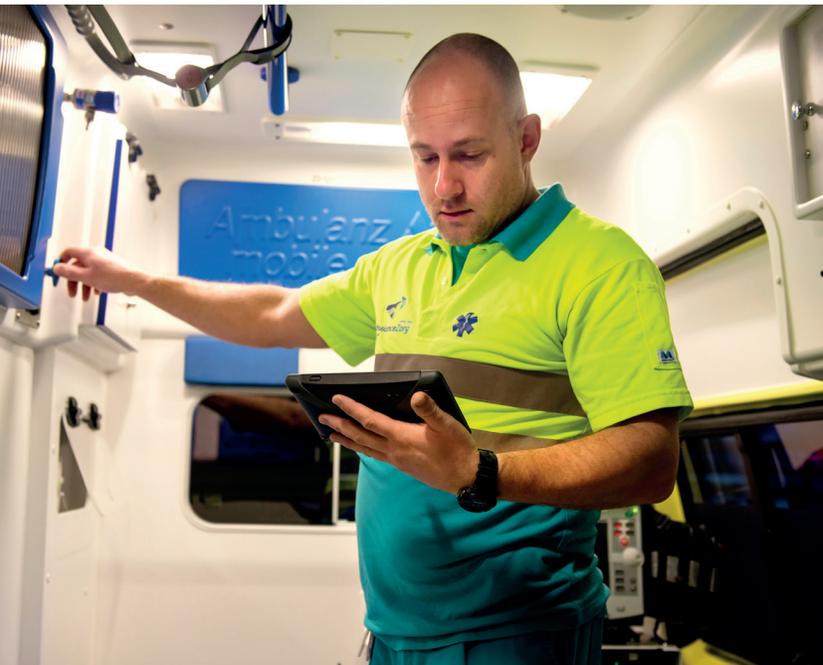

Our developer portal puts the power of TomTom BRIDGE in your hands. It offers detailed information on our APIs, a document library, case studies, access to our developers' forums and links to TomTom content downloads. You can customize a wide range of settings on your TomTom Bridge, including icon appearance, app arrangement, privacy controls, workflows and start-up sequences. And it's simple to access audio settings, and sensors, including the device compass, gyro and G sensor. Know more at: <http://developer.tomtom.com/products/bridge>

**Logistics**

TomTom BRIDGE offers truck-friendly routes, millions of points of interest, greater efficiency and fewer risks –plus it’s a future-proof solution. You can capture signatures on-screen for paperless reports and even link a rear camera to BRIDGE, ensuring safe reverse parking at delivery.

**Medics**

Every second counts when you’re saving lives. TomTom BRIDGE offers healthcare professionals fast routes to connected hospitals that can provide the most suitable treatment, while reading the patient’s health card via NFC. Patient medical records are kept updated whether you’re on the road or at the hospital.

**Construction**

Maximize your mobile workers’ performance and minimize downtime with TomTom BRIDGE. Easily give directions to the closest assignment location, increase quality control by providing vital information on-site, and offer a faster service by scanning data from Wi-Fi or NFC tags.

- **Superb Connectivity:** TomTom BRIDGE boasts the latest technologies, including Wi-Fi, Bluetooth 4.0 and USB OTG.
- **Premium Features:** Enjoy premium features like Near Field Communication (NFC), Camera, Flashlight and built-in 3G modem.
- **Powerful Platform:** TomTom BRIDGE uses the Qualcomm Snapdragon processor, ensuring all your business applications integrate seamlessly with navigation.

- **Fully Configurable:** Using our SDK, you can create your own TomTom BRIDGE software image that integrates your business applications –so you can control exactly what is on your company’s devices.
- **Preloaded Apps:** TomTom BRIDGE is preloaded with Android™ Open Source Platform (AOSP) apps like email, calculator, web browser, music player and many more. BRIDGE also includes an app store offering a suite of other business applications.

- **Truck-Specific Routing:** Get customized routes for your company’s vehicle types, size, weight, cargo and speed.
- **Lifetime Maps:** Your fleet can drive with the latest maps for the lifetime of the device—at no extra cost.\*
- **TomTom Navigation:** Improve your fleet’s performance on the road with TomTom’s voice-guided turn-by-turn navigation.
- **Lifetime TomTom Traffic:** Ensure drivers take the fastest routes with real-time traffic\*\* information for the lifetime of the device.

- **Industrial Grade:** TomTom BRIDGE has been tested in challenging conditions to ensure it will withstand tough conditions on the road. BRIDGE can cope with high vibration patterns, has the E-Mark certification, works in extreme temperatures (from -20°C to +60°C / -4°F to 140°F) and is shockproof.
- **Made for Drivers:** TomTom BRIDGE offers flexible docking options, a high-precision GPS, 10-32V power supply, and a 7-inch capacitive multi-touch display—all making operation simple and reliable.

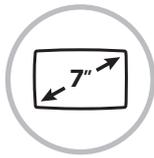

\*Lifetime Maps: download 4 or more full updates of any installed map every year, for the useful life of your product. For more information, visit [tomtom.com/lifetimemaps](http://tomtom.com/lifetimemaps)
