# TimoCom
Soft- und Hardware GmbH

The TimoCom transport barometer app on TomTom BRIDGE enables mobile access to your TimoCom account and all of your contracted platforms.

TimoCom Soft- und Hardware GmbH, is an IT-specialist, specialised in development and connection of applications for the transport and logistics industry. The company runs Europe's largest digital transport platform. On the TimoCom platform, up to 750,000 international freight and vehicle offers are entered daily by more than 120,000 users from all over Europe.

There are more than 38,500 verified companies in the logistics network. TimoCom digitally connects cargo owners, freight forwarders and hauliers to significantly optimize their daily business. In short: TimoCom brings freight and vehicle space together for everyone involved in the logistics chain.

TimoCom on BRIDGE allows truck drivers to log directly into the TimoCom platform - and even on the go, find the right load or offer free cargo area. With TomTom's LiveTime Traffic information combined with the TimoCom app truck drivers can easily find transport orders across the globe or place their free cargo area in the transport platform to ensure return or payloads at any time. This ensures customers to achieve their goal through an ideal route planning based on real-time traffic information. The integration into the interface to the TomTom Navigation brings more advantages, since all the address data of the transport orders are taken directly from the TimoCom platform and the routes will be updated accordingly.

The solution
Mobile access to Europe's biggest transport platform via transport barometer app including:
- Freight exchange with more than 750,00 international offers daily
- Tracking interface for over 210 telematics systems
- Warehousing exchange with up to 30,000 logistics possibilities in 44 countries
- Fixed tenders and quick determination of market price
- Offer-related chat including export function
- Transport barometer app for optimal market overview

The results
Full access to TimoCom account via app enables users to:
- Quickly react to new business opportunities at any time
- Find freight and offer vehicle space Europe-wide
- Always know where your vehicles are thanks to GPS vehicle localisation
- Participate in a tender for a transport job at any time
- Offer warehousing space flexibly and quickly find empty storage space
- Mobile networking with the company profiles for transport and logistics in TC Profile®

"TimoCom is the digital interconnection between the provider of a freight transport order and the transport service provider."
