# Overview

---

Your TomTom Hands-Free Car Kit can be used as follows:

- For charging your phone while you are driving.
- To make hands-free calls, even if your phone is not mounted in the Car Kit.
- To start the speech recognition functions on your phone.

## Charging

When plugged in to your Car Kit, your phone charges. If your phone is not mounted in your Car Kit but only connected using Bluetooth, your phone will not charge.

## Using your TomTom Hands-Free Car Kit

The TomTom Hands-Free Car Kit speaks to you to give you information.

You can [change the language](#) that your Car Kit uses to speak to you.

## Hands-free calls

To use your Car Kit for hands-free calling, you need to [pair your phone](#) with your Car Kit using Bluetooth®.

Once you have paired your phone, it connects automatically with your Car Kit when you are in the car. Once a phone is connected, you can use your Car Kit to [make and receive calls](#) on that phone.

## Playing music or other sound

Once you have connected your Car Kit to your phone, any sound from your phone is played through the speaker on your Car Kit. This could be music or sound from any other app on your phone.

- USB car charger

- Dashboard mount disk

- Microphone

- Microphone clip

- Microphone extension cable

- Cable clips

# Getting started

---

## Mounting your TomTom Hands-Free Car Kit in your car

To mount your TomTom Hands-Free Car Kit in your car, follow the instructions on the poster included in the box.

Consider carefully where to attach the mount in your car. The mount should not block or interfere with any of the following:

- Your view of the road
- Any of the controls in your car
- Any of your mirrors
- Any airbags

When your navigation device is in the mount, you should be able to reach the device easily without leaning or stretching. You can attach the mount to the windscreen or side window or you can use a Dashboard Mount Disk to attach the mount to your dashboard. The following diagrams show where you can safely attach the mount.

Adjust the holders on the mount so that they can be used to hold your phone when it is placed in the mount without pressing any buttons or interfering with any connection sockets.

When you place your phone in the mount, the battery on your phone charges. For smartphones, you need to connect the USB connector to your phone to charge it.

**Note:** Make sure you use your Car Kit with the USB charger provided. Other chargers may not provide enough power and your Car Kit may not function correctly.

To use the microphone on your Car Kit for hands-free calls, connect the microphone or, if required, the microphone extension cable to the mount.

Make sure you set up the microphone securely and safely in your car so that the microphone cable does not interfere with any of the controls in your car.

**Tip:** To ensure the best quality possible, we recommend that you use the microphone extension cable to attach the microphone as close to you as possible when you are speaking. Use the microphone clips to attach the microphone and the cable to the windscreen frame or the sun visor in your car.

## Starting your TomTom Hands-Free Car Kit for the first time

When you first connect your TomTom Hands-Free Car Kit to a power supply, your Car Kit starts and plays the TomTom drums sound.

Your Car Kit is initially set to use English to give you information.

To change the language, do the following:

1. Press the **Menu** button once you have heard the TomTom drums and your Car Kit talks to you for the first time.

The first information that your Car Kit gives you is about the language it is using.

After you press the **Menu** button, your device reads a sentence in each language that is available.

2. When you hear the language that you want your Car Kit to use, press the **Menu** button again.

If you don't press the menu button to change the language, your Car Kit continues to use English for all messages.

Your Car Kit now starts trying to [connect to your phone](#).

If you don't change the language when you first start your Car Kit, you can [change the language](#) later using the menu.

## Connecting your TomTom Hands-Free Car Kit to your phone

If you have not already connected or paired your TomTom Hands-Free Car Kit with your phone, when you connect your Car Kit to a power supply, it starts trying to connect to your phone using Bluetooth®.

Your Car Kit tells you that it is in connection mode and ready to connect to your phone.

If you have already connected one phone to your Car Kit and you want to connect another phone, you should [start the connecting process from the menu](#).

To connect, do the following:

- Make sure that you switch on Bluetooth® on your phone.
- On your phone, search or scan for other Bluetooth® devices.
- On your phone, select 'TomTom Hands-Free Car Kit' when it shows you a list of devices you can connect to.
- You may have to enter the password '0000' on your phone in order to connect to your TomTom Hands-Free Car Kit device.
- To avoid having to enter '0000' every time you use the phone, save your TomTom Hands-Free Car Kit device as a trusted device on your phone.

For additional information about Bluetooth settings, refer to your mobile phone user guide.

If the connection process is unsuccessful, you can either disconnect your Car Kit from the power supply then reconnect it to start the connection process again, or [start the connection process from the menu](#).

Once your phone is paired, your Car Kit tries to connect to your phone whenever it is switched on.

### Connecting to another phone

To connect or pair your Car Kit with another phone, you should [start the connection process from the menu](#).

You can pair your Car Kit with up to 5 phones. Once a phone is paired, your Car Kit tries to connect with it automatically whenever it is switched on.

Two phones can be connected to your Car Kit at once. Once a phone is connected, you can use your Car Kit to make and receive calls on that phone.

### Starting the connection process from the menu

To start the process of connecting, or pairing, your TomTom Hands-Free Car Kit with a phone from the menu, do the following:

1. Press and hold the **Menu** button on your Car Kit until you hear a beep.

Your Car Kit tells you that it is in menu mode.

**Note:** If you press and release the menu button, speech recognition is started on your phone. Make sure you stop speech recognition on your phone before starting the menu mode.

Your Car Kit tells you to press the **Menu** button for the connection mode.

2. Press and release the **Menu** button.

Your Car Kit tells you that it is in connection mode and starts trying to connect to or pair with your phone.

3. On your phone, search or scan for other Bluetooth® devices.
4. On your phone, select 'TomTom Hands-Free Car Kit' when it shows you a list of devices you can connect to.

You may have to enter the password '0000' on your phone in order to connect to your TomTom Hands-Free Car Kit device.

Once connection is complete, your Car Kit tells you that it is connected with your phone.

If connection is unsuccessful, start the process from the menu again.

### Changing the language

When you [first connect your TomTom Hands-Free Car Kit to a power supply](#), it tells you the language it uses to give you information. To change the language, press the **Menu** button at this point.

To change the language at any other time, do the following:

1. Press and hold the **Menu** button on your Car Kit until you hear a beep.

Your Car Kit tells you that it is in menu mode.

**Note:** If you press and release the menu button, speech recognition is started on your phone. Make sure you stop speech recognition on your phone before starting the menu mode.

Your Car Kit tells you to press the **Menu** button for connection mode. Do not press the **Menu** button.

Your Car Kit tells you to press the **Menu** button to change the language.

2. Press and release the **Menu** button.

Your Car Kit now lists each language available, and tells you to press the **Menu** button to switch to that language.

3. When you hear the language you want your Car Kit to use, press and release the **Menu** button.

Your Car Kit leaves menu mode and the language used to give information changes to the language you selected.

### Changing the volume

Use the volume buttons on the side of your Car Kit to change the volume.

You can change the volume at any time during hands-free calls or while any other sound, such as music, is being played through the speaker on your Car Kit.

You cannot change the volume while your Car Kit is giving you information.

# Hands-free calling

---

---

## About hands-free calling

Your Car Kit includes a microphone and speaker and so can be used to make and receive hands-free calls.

Your phone and your Car Kit must be [paired using Bluetooth and connected](#).

You can pair your Car Kit with up to 5 phones. Once a phone is paired, your Car Kit tries to connect with it automatically whenever it is switched on.

Two phones can be connected to your Car Kit at once. Once a phone is connected, you can use your Car Kit to make and receive calls on that phone.

Your phone can be mounted in your Car Kit but you can still make hands-free calls without mounting your phone, as long as your phone and Car Kit are paired and connected.

If your phone is mounted in your Car Kit, you cannot use the **Accept call** and **Reject call** buttons on your Car Kit.

## Making and receiving calls

---

**Important:** You should always take local laws into account when making or receiving a call while driving. Never allow yourself to be distracted when driving as this could be dangerous to you and other road users. You should only press buttons on your phone if it is mounted in your Car Kit.

---

### Accepting an incoming call

There are two ways of accepting a call:

- Accept the call on your phone.
- Press the **Accept call** button on your Car Kit.

**Note:** The **Accept call** and **Reject call** buttons on your Car Kit cannot be used if your phone is mounted.

### Ending a call

There are two ways of ending a call:

- End the call on your phone.
- Press the **Reject call** button on your Car Kit.

**Note:** The **Accept call** and **Reject call** buttons on your Car Kit cannot be used if your phone is mounted.

## Redialling

To redial the last number you dialled, press and hold the **Accept call** button on your Car Kit.

**Note:** Not all phones support redialling using your Car Kit. If it's not possible to redial, your Car Kit tells you.

## Making a call

- You can start a call by dialling a number or selecting a contact on your phone.
- You can use speech recognition on your phone to start a call.

# Using your TomTom Hands-Free Car Kit

---

## Speech recognition

If your phone supports speech recognition, for example, Siri on the iPhone or Voice Actions on Android phones, you can start speech recognition from your Car Kit.

To start speech recognition, press and release the **Menu** button.

## Resetting your device

If you have a problem with your device, you may need to reset it to its factory settings.

To reset your device, do the following:

1. Press and hold the **Accept call** and **Reject call** buttons on your Car Kit at the same time.  
You have to hold both buttons pressed for some time.  
You are asked to confirm that you want to reset your device.
2. Press and release the **Menu** button to reset your device.

# Addendum

---

---

## **CE marking**

This equipment complies with the requirements for CE marking when used in a residential, commercial, vehicular or light industrial environment, achieving all the appropriate provisions of the relevant legislation in the EU.

## **R&TTE directive**

Hereby, TomTom declares that TomTom personal navigation devices and accessories are in compliance with the essential requirements and other relevant provisions of the EU Directive 1999/5/EC. The declaration of conformity can be found here: [tomtom.com/legal](http://tomtom.com/legal).

## **Exposure limits**

This device complies with radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.

## **TomTom Hands-Free Car Kit**

TomTom has designed this car kit for certain compatible smartphones to make sure you have the best user experience. TomTom does not accept any responsibility for any damage to your phone that occurs when used with this accessory. Please review our exact warranty on here: [tomtom.com/legal](http://tomtom.com/legal).

## **Charger**

If your device requires a charger, please use this device with the charger provided.

For replacement chargers, go to [tomtom.com](http://tomtom.com) for information about approved chargers for your device.

To recycle your TomTom unit, please see your local approved TomTom service centre.
