Getting started

Start TomTom Nav Compatible with Sony XAV/XNV-KIT

Tap this button on your Sony XAV/XNV-KIT to start the TomTom Nav App.
When started, TomTom Nav App shows the Driving View.

Navigation

The language used for buttons and menus in TomTom Nav App is the same as the language you selected in your Sony XAV/XNV-KIT settings. If you change the language you must park your car in a safe place, turn off your car ignition and start your car again to see the new language.

Important: Stop your car in a safe place before you turn off the ignition.

Starting for the first time

When you start TomTom Nav App for the first time, you see the following screen:

- Legal notice - You must read and agree to the Legal notice to be able to use TomTom Nav App.

Starting after a reset

When you start TomTom Nav App after a reset, you see the Legal notice. You must read and agree to the Legal notice to be able to use TomTom Nav App.

GPS reception

When you first start TomTom Nav App, it may need a few minutes to find your GPS position and show your current location on the map.

To make sure you have good GPS reception, you should use your device outdoors. Large objects such as tall buildings can sometimes interfere with reception.

Important: TomTom Nav App cannot give you route instructions until it has received location data.
Planning a route

**Important:** In the interest of safety and to reduce distractions while you are driving, you should always plan a route before you start driving.

To plan a route with TomTom Nav App, do the following:

1. Tap the screen to open the Main menu.

   ![Main menu screenshot]

2. Tap **Drive to**.

   **Tip:** When you use TomTom Nav App for the first time you are asked to choose a country.

3. Tap **Address**.

   **Tip:** If you want to change the country, state or region, tap the flag before you select a city.

4. Start to type the name of the town you want to go to.

   As you type, the names of the towns that match what you have typed are shown. When your destination appears in the list, tap the name of the town to set the destination.
Tip: You can also type in the postal code of your destination. First select the country, then select the postcode from the list shown to display a list of streets in that postcode.

5. Start to type the name of the street. Just as for place names, the names of the streets that match what you have typed are shown. When your destination appears in the list, tap the name of the street to set the destination.

Tip: Hide the keyboard so you can see more results on the screen.

6. Enter the house number and then tap Next.
You can also select the point where two streets meet by tapping **Crossing**.

7. The destination is shown. Tap **Select** to accept the destination, or tap the back arrow to change the destination.

8. The route is calculated and shown.
   By default, the fastest route is planned. You can change the **type of route** used for planning.
   If IQ Routes is available on your map, this information is used to plan the best possible route taking into account the real average speeds measured on the roads.
9. Tap **Go!**
   TomTom Nav App starts to guide you to your destination using spoken instructions and on-screen directions.

### Route summary

After you plan a route, a summary of the route is shown.

The Route Summary screen shows an overview of your route on the map and the estimated travel time including delays caused by busy roads.

![Route Summary Screen](image)

The bottom of the Route Summary screen shows the following options:

- Tap **Change route** to open the Change route menu. Here you can add **Travel via** stops and change your route.
- Tap **Go!** to start route guidance.
- Tap **Route details** to open the Route information menu.

You can view the route summary at any time by tapping the arrival time panel on the right side of the **Driving View**.
Route information
Tap the arrival time panel on the right side of the Driving View at any time to show the Route Information screen.

Tap Route details on the Route Information screen to show the Route information menu. You see the following options:

- **Show route instructions**: Tap this button for a list of all the turn instructions on the route.
- **Show map of route**: Tap this button to see an overview of the route using the map.
- **Show route demo**: Tap the Show route demo button to watch a demo of the trip. To stop a demo, tap the screen, then tap Yes.
- **Show destination**: Tap this button to see a preview of your destination. Tap More... to show more information about the location, to search for parking nearby or to add the location to your Favorites.

Other Drive to options
When you tap Drive to in the Main menu, you can select your destination in the following ways:

- **Home**: Tap this button to plan a route to your Home location. To set your Home location, tap Change home location in the Settings menu.
Tap this button to select a Favorite to drive to.
To add a favorite, tap Manage favorites in the Settings menu.

**Favorite**

Tap this button to enter an address or a postal code as your destination.

**Address**

Tap this button to select your destination from a list of places you have recently used as destinations. These also include your Travel via stops.

**Recent destination**

Tap this button to navigate to a Point of Interest (POI).

**Point of Interest**

Tap this button to select a point on the map as your destination.

**Point on map**

**Change route**

Once you have planned a route, you may want to change something about the route, without changing your destination. You may want to change the route for one or more of the following reasons:

- You can see a roadblock or a line of traffic ahead.
- You want to travel via a particular location to pick someone up, stop for lunch or get gas.
- You want to avoid a difficult junction or a busy narrow street.

**Planning a route in advance**

You can use TomTom Nav App to plan a route in advance by selecting your starting point and your destination.

You can use advanced route planning to check a route or the time it will take.

To plan a route in advance, do the following:

1. Tap the screen to open the Main menu.
2. Tap **Advanced planning**.

3. Select the starting point for your trip in the same way that you would select your destination.
4. Set the destination for your trip.
5. Choose the type of route that should be planned.
   - **Fastest route** - the route which takes the least time.
   - **Eco route** - the most fuel-efficient route.
   - **Shortest route** - the shortest distance between the locations you set. This may not be the quickest route, especially if the shortest route is through a town or city.
   - **Avoid highways** - a route which avoids highways.
   - **Walking route** - a route designed for making the trip on foot.
   - **Bicycle route** - a route designed for making the trip on a bicycle.
   - **Limited speed** - a route based on a maximum speed. When you choose this type of route, you enter a maximum speed. The route and estimated time of arrival are then planned based on the speed that you entered.
6. Choose the date and time you want to start the trip you are planning. You can set the time in 5 minute intervals.
   TomTom Nav App uses IQ Routes to work out the best possible route at that time, using the real average speeds measured on roads. In this way you can compare how long a trip takes at different times of day, or on different days of the week.
7. Tap **Done**. TomTom Nav App plans the route between the two locations you selected.
8. Tap **Go!** to return to the Driving View.
9. If you want to see a demonstration of your route, tap **Route details** on the Route Summary screen, then tap **Show route demo**.
Driving View

The Driving View

1. The name of the next street on your route.
2. Your current position.
3. The remaining distance of your trip, the remaining trip time and the estimated arrival time.
   Tap this area to open the Route Summary screen.
4. Tap this button to show the quick access toolbar.
5. Driving instruction for the road ahead and the distance to your next turn.
   Tap this area to open the volume control and to repeat the previous instruction.
6. Your current speed and, if known, the speed limit at your current location. If you exceed the speed limit this area appears red.

Moving around in the Driving View

When you plan a new route, you are shown the Driving View together with detailed information about your current location.

Tap the center of the screen at any time to open the Main menu.
Returning to the Driving View

To return to the Driving View at any time tap the return arrow in the top right corner of the screen:

To return to the previous screen tap the back arrow in the top left corner of the screen:

Setting the volume

Tap the driving instruction panel to show the volume control.

Move the slider from left to right to increase the volume of voices.
Move the slider all the way to the left to mute voices. When the sound is muted, the mute sound indicator is shown in the driving instruction panel.

Quick access toolbar

Tap the quick access toolbar button to display the following options:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="#" alt="Map" /></td>
<td>Tap this button to use a 2D map in the Driving View. If the 2D map is being used, this button changes to a 2D symbol. Tap the button again to use the 3D map.</td>
</tr>
<tr>
<td><img src="#" alt="Voice" /></td>
<td>Tap this button to switch off voice guidance. You will no longer hear spoken route instructions but you will still hear information such as warnings. If the voice is muted, this button changes to Enable Voice. Tap the button again to turn voice instructions back on. When voice instructions are disabled, the voice disabled indicator is shown in the driving instruction panel.</td>
</tr>
<tr>
<td><img src="#" alt="Night" /></td>
<td>Tap this button to use night colors on the menus and maps. If night colors are being used, this button changes to a moon symbol. Tap the button again to switch back to day colors.</td>
</tr>
</tbody>
</table>

Map settings

You can change the way the map looks and behaves as you drive, and change what you see on the map.
About Advanced Lane Guidance

TomTom Nav App helps you prepare for highway exits and junctions by showing you which lane you should be in.

**Note:** Advanced Lane Guidance is not available for all junctions or in all countries.

For some exits and junctions, an image shows the lane you should be in. To turn the images off, switch **Show lane guidance images** off in the Advanced Settings menu.

For other exits and junctions, TomTom Nav App shows the lane you should take in the driving instruction panel.
Changing your route

Making changes to your route
You can make changes to your planned route using the **Change route** menu.

You can open the route options as follows:

- Tap **Change route** in the Main menu.
  
  **Tip:** **Change route** is only available when you have planned a route.

- Tap **Change route** on the Route Summary screen after you plan a route.

- Tap the distance panel on the right side of the Driving View to open the Route Summary screen, then tap **Change route**.

The following buttons are available in the **Change route** menu:

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Clear route</strong></td>
<td>Tap this button to clear the currently planned route.</td>
</tr>
<tr>
<td><strong>Avoid roadblock</strong></td>
<td>Tap this button if you can see a roadblock or a line of traffic ahead. You then have to choose how much of the route ahead you want to avoid. Choose from the different options available. TomTom Nav App recalculates your route avoiding the section of the route for the distance you selected. Don’t forget that once a new route is calculated, you may have to turn off the road you are on very soon. If the roadblock suddenly clears, tap <strong>Recalculate route</strong> to return to your original route.</td>
</tr>
<tr>
<td><strong>Calculate alternative</strong></td>
<td>Tap this button to calculate an alternative to the current route. Apart from the roads near your current position and near your destination, a new route is calculated using totally different roads to reach your destination. This is an easy way of planning a different route to the same destination. TomTom Nav App looks for another route from your current location to your destination. When a route has been calculated you can tap <strong>Alternative route</strong> to use the new route, or tap <strong>Previous route</strong> to use the original route. If you decide later that you would prefer to use the original route after all, use <strong>Recalculate route</strong>.</td>
</tr>
<tr>
<td><strong>Travel via...</strong></td>
<td>Tap this button to change your route so that it passes a particular location, perhaps to pick someone up on the way. You can add up to four extra stops along your route.</td>
</tr>
</tbody>
</table>
Avoid part of route

Tap this button to avoid a part of the route. Use this button if you see that your route includes a road or junction you don’t like, or which is well-known for traffic problems.

You then choose the road you want to avoid from a list of the roads on your route.

Recalculate route

Tap this button to recalculate the route using your existing route settings and HD Traffic.

Travel via...

Travel via... lets you add up to four extra stops on your planned route.

Travel via...

Tap this button to add or change stops.

When you have not yet entered a stop, the Travel via... menu opens.

When you have already entered a stop, the list of stops is shown. Tap Add to open the Travel via... menu.

Choose the stop in the same way as you choose a destination. This means you can select from all the same options that are offered when you choose a destination, for example Address, Favorite, Point of Interest or Point on map.

When you have added a stop it is shown in the Travel Via list.

If you want to change a stop, tap it to open the information screen, which shows the following options:

Move up

Tap this button to move the stop up in the list.

Move down

Tap this button to move the stop down in the list.

Switch on / Switch off notification

Switch on notification to get a voice message saying you are near the stop.

Delete

Tap this button to delete the stop.

When you have added Travel Via stops, tap the Done button at the top of the Travel via screen. TomTom Nav App calculates a new route to your destination that passes through the stops you chose. A flag appears in the Driving View at each of your Travel via stops. Unlike at your final destination, TomTom Nav App only gives a sound alert when you reach a Travel via stop.

Tap Done. TomTom Nav App calculates a new route to your destination that passes the stops you chose. Tap Go! to start driving. A flag appears in the Driving View at each of your Travel Via stops and you get a voice message saying that you are near the stop.
Settings

To change the way TomTom Nav App looks and behaves, tap **Settings** in the Main menu.

**Change home location**

Tap this button to set or change your home location. Select the address for your home location in the same way that you select a destination. Your home location can be somewhere you often visit, such as your office. This feature provides an easy way to navigate there by tapping the **Home** button in the **Drive to** menu.

**Driving safety**

Tap this button to set the following warnings for places on your route.

- **Warn for schools and places of worship** - Adjust this setting to warn you when you are driving near a place of worship, a school, a college or a university. The warning is not given when you are driving on a highway, or between the hours of 6:00pm and 6:00am. The following icons appear in the Driving View:

  - ![200 m][Driving near a place of worship.
  - ![200 m][Driving near a school.
  - ![200 m][Driving near a college or university.

- **Warn when driving faster than allowed** - Adjust this setting to warn you when you are driving above the speed limit.

You can select a warning alert sound for each warning.
Driving View

Tap this button to set the information that is shown on the map in the Driving View. The following options are available:

Show point of interest
This setting lets you choose which POIs are shown on the map. Tap Next to choose to show POIs in 2D and 3D driving views and maps.

Show street names on map
When this setting is on, street names are shown on the map.

Show next street name
When this setting is on, the next street name or number on your route is shown in the Driving View.

Show current street name
When this setting is on, the current street name or number on your route is shown in the Driving View.

Auto-Zoom in 2D and 3D modes
Auto-Zoom automatically adjusts the area of the map and level of detail shown in the Driving View. Switch off Auto-zoom to manually control the use of zoom in the Driving View.

Voices
Tap this option to select the voice used for instructions.

- Voice selection
  Tap a voice to select it. When you select a voice, a sample of that voice is played.
  You can choose from two different kinds of voices.
  - A basic voice reads the driving instructions but does not read the street names, road numbers or signs.
  - An advanced voice gives driving instructions and pronounces street names, signs and status messages. You can only use an advanced voice that is in the language your device uses. You must select an advanced voice to be able to select the following options:
    - Read aloud road numbers
    - Read aloud street names

Distance units
Tap this button to use either Kilometers or Miles for all distances and speeds.
Map colors

Tap this button to change the map colors.

Tap **Change day colors** to select a day color scheme consisting of bright colors.

Tap **Change night colors** to select a night color scheme consisting of darker colors.

**Auto switch** automatically changes between day and night colors depending on the time of day.

Car symbol

Tap **Car symbol** to select the car symbol that shows your current location in the Driving View.

Route planning

Adjust the Route planning settings to set how routes are planned.

**Route type**

Adjust this option to set the type of route that is planned when you plan a new route.

You can select the following types of route:

- **Always ask me** - if you select this option, you are always asked to select the type of route that should be planned.
- **Fastest route** - the fastest route to your destination.
- **Shortest route** - the shortest route to your destination. This may take much longer than the fastest route.
- **Eco route** - always plan the most fuel-efficient route.
- **Walking route** - this type of route is optimized for walking.
- **Bicycle route** - this type of route is optimized for bicycles.
- **Avoid highways** - this type of route avoids all highways.
- **Limited speed** - a route based on a maximum speed. When you choose this type of route, you enter a maximum speed. The route and estimated time of arrival are then planned based on the speed that you entered.

You can set how each of the following road types is handled when a new route is planned:

- **Toll roads**
- **Ferry crossings**
- **Carpool lanes** - Carpool lanes are sometimes known as High Occupancy Vehicle Lanes. To travel in these lanes, you may need to have more than one person in the car, for example, or the car may need to use environmentally-friendly fuel.
- **Unpaved roads**

You can set the following actions to be taken for each type of road:

- **Ask** - when the route is planned, you have to select how to handle these roads when they occur on your route.
- **Always** - the type of road is always avoided automatically.
- **Never** - the type of road is never avoided automatically.

### Advanced settings

Tap **Advanced settings** to adjust the following settings:

#### Advanced settings

**Show lane guidance images**
Adjust this setting to switch lane images on and off.

*Advanced Lane Guidance* helps you prepare for highway exits and junctions by showing you which lane you should be in.

**Plan IQ Routes**
Adjust this setting to switch IQ Routes on and off.

IQ Routes is used when you plan a route. Your route is calculated using information about the real average speeds measured on roads, so your route may change depending on the time of day and day of the week.

*Note*: IQ Routes information is not available for all regions. For more information on IQ Routes, go to [tomtom.com/iqroutes](http://tomtom.com/iqroutes).

**Auto hide route summary after 10 seconds**
Activate this setting to automatically close the Route Summary screen after 10 seconds.

**Show location previews**
Activate this setting to show a preview of your destination location before going to the Route Summary screen.

### About

Tap **About** for information about the application and map version as well as details about licenses, copyright, information sharing, and legal information.

### Reset to defaults

Tap this button to reset TomTom Nav App to the default settings. You lose your settings and saved locations.
The Main menu

When you start TomTom Nav App without having earlier planned a route, the Main menu is shown. To open the Main menu from the Driving View, tap the screen.

The following buttons are available in the Main menu:

- **Drive to**: Tap this button to start planning a route.

- **Change route**: Tap this button to change your route or clear your route. **Note**: This button is only active if a route is planned.

- **View map**: Tap this button to browse the map in the same way as you might look at a traditional paper map.

- **Advanced planning**: Tap this button to plan a route in advance, selecting your starting point and your destination.

- **Manage favorites**: Tap this button to go to Favorites where you can add to, edit and delete your Favorites.

- **Settings**: Tap this button to change how TomTom Nav App behaves.
Drive to menu

When you tap Drive to in the Main menu, you can select your destination in the following ways:

**Home**
Tap this button to plan a route to your Home location.
To set your Home location, tap **Change home location** in the Settings menu.

**Favorite**
Tap this button to select a Favorite to drive to.
To add a favorite, tap **Manage favorites** in the Settings menu.

**Address**
Tap this button to enter an address or a postal code as your destination.

**Recent destination**
Tap this button to select your destination from a list of places you have recently used as destinations. These also include your Travel via stops.

**Point of Interest**
Tap this button to navigate to a Point of Interest (POI).

**Point on map**
Tap this button to select a point on the map as your destination using the Map Browser.

Returning to the Driving View

To return to the Driving View at any time tap the return arrow in the top right corner of the screen:

To return to the previous screen tap the back arrow in the top left corner of the screen:
View map

Viewing a map
Tap View map in the Main menu to open the map. You can view the map in the same way that you look at a traditional paper map.

You can move around the map by using your finger to drag the map across the screen. You can zoom in and out using the zoom buttons on the left side of the map. You can also zoom in by tapping the screen twice with one finger.

Tap Details to choose what to show on the map:
- **Names** - shows street and other names.
- **Points of Interest (POIs)** - shows points of interest.
- **Favorites** - shows your Favorites.
- **Satellite images** - shows a satellite image when zoomed out instead of a street map.

You can select or find a location on the map, then drive to that location.

Selecting items on the map
You can select a location on the map in the following ways:
- Tap the map to place the cursor at the location you tap.
- Tap a POI on the map.
- Tap Find and search for a location on the map. Choose the location in the same way as you choose a destination. This means you can select from all the same options that are offered when you choose a destination, for example Address, Favorite, Landmark or Point of Interest, or Point on map.

Details of a location are shown, along with an arrow.

Tap the location to open a menu with the following options:
<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drive there</td>
<td>Tap this button to plan a route from your current location to the cursor position.</td>
</tr>
<tr>
<td>Travel via...</td>
<td>Tap this button to travel via the cursor position on the route that is currently planned. This option is only active if you have already planned a route.</td>
</tr>
<tr>
<td>Add to favorites</td>
<td>Tap this button to add the cursor position as a Favorite. You can choose to give the favorite a name or you can use the suggested name.</td>
</tr>
<tr>
<td>Find POI nearby</td>
<td>Tap this button to search for POIs near the location.</td>
</tr>
<tr>
<td>Centre on map</td>
<td>Tap this button to move the map so that the cursor position is in the center of the screen. The map zooms in on the cursor position.</td>
</tr>
<tr>
<td>View location details</td>
<td>Shows the details of the location you selected. Tap More... to show more information about the POI, to search for parking nearby or to add the location to your favorites.</td>
</tr>
</tbody>
</table>
Points of Interest (POIs)

About POIs
Points of Interest or POIs are useful places on the map.
Here are some examples:

- Restaurants
- Hotels
- Museums
- Parking garages
- Gas stations

There are several places where you can use POIs in TomTom Nav App:

- Selecting a POI as your destination when planning a route.
- Calling a POI from the map.
- Selecting which POIs to show on the map.

Driving to a POI
You can select a POI as your destination or as a Travel via location in the following way:

1. Tap the screen to show the Main menu.
2. If you want to navigate to a POI, tap Drive to then tap Point of Interest.
3. If you have already planned a route and want to add a POI as a Travel via stop, tap Change route on the Route Summary screen. Tap Travel via... then tap Point of Interest.
4. Narrow your choice of POIs by selecting the area where the POI is located.

The following options are available:

Tap this button to choose from a list of POIs near to your current location.

POI near you

Tap this button to choose from a list of POIs near to your Home location.

POI near Home

Tap this button to find a POI in a particular town or city.

POI in city
The following options are available when a route is already planned:

- **POI along route**
  Tap this button to find a POI along your planned route.

- **POI near destination**
  Tap this button to find a POI near your planned destination.

5. Select the category of POI.
   Tap **Search POI** to search for a POI by name. All POIs in all categories are searched.
   Tap the category of the POI, if it is shown.
   Tap **Other categories** to choose from the complete list of categories. Select the category from the list.

6. From the list of POIs shown, select the POI you want to navigate to.
   The list below explains the distances listed next to each POI:
   - POI near you - Distance from your current location
   - POI in city - Distance from the city center
   - POI near Home - Distance from your Home location
   - POI along route - Distance from your current location
   - POI near destination - Distance from your destination.
   If you have planned a route, a symbol is also shown next to each POI:

   - POI is on your route
   - POI is close to your route
   - POI is fairly close to your route.

   After you select a POI, detailed information such as the phone number and a short description is shown. You can tap the phone number to phone the POI.

7. Tap **Select** to confirm you want to plan a route to this POI.

8. Tap **Go!**
   TomTom Nav App starts to guide you to your destination using spoken instructions and on-screen directions.

**Finding a POI on the map**
You can find a POI using the map then contact the POI or navigate to it.
1. Tap the screen to show the Main menu.
2. Tap View map. Make sure Points of Interest are selected in the Details page. You can also select which POIs to show on the map.
3. Find a POI on the map. You can tap Find then Point of Interest to find POIs along your route or in a city, and zoom in and move the map.
4. Select a POI symbol then tap the POI name panel to display the POI menu. The following options are available:

- Drive there
  Tap this button to plan a route from your current location to the cursor position.

- Travel via...
  Tap this button to travel via the cursor position on the route that is currently planned. This option is only active if you have already planned a route.

- Add to favorites
  Tap this button to add the cursor position as a Favorite. You can choose to give the favorite a name or you can use the suggested name.

- Find POI nearby
  Tap this button to search for POIs near the location.

- Centre on map
  Tap this button to move the map so that the cursor position is in the center of the screen. The map zooms in on the cursor position.

- View location details
  Shows the details of the location you selected. Tap More... to show more information about the POI, to search for parking nearby or to add the location to your favorites.

Showing POIs on the map

POIs can be shown in the Driving View and on the map.

To show POIs in the Driving View, do the following:
1. Tap Settings in the Main menu.
2. Tap Driving view.
3. Tap Show point of interest.

To show POIs on the map, do the following:
1. Tap View map in the Main menu.
2. Tap the Details button.
3. Tap **Points of Interest (POIs)** to show POIs on the map.

**Selecting which POIs to show on the map**

You can select the categories of POIs that are shown, for example, gas stations, restaurants and hotels.

To change the POI categories shown in the Driving View, do the following:

1. Tap **Settings** in the Main menu.
2. Tap **Driving view**.
3. Tap **Show point of interest**.
4. Select which POIs you want to be shown on the map.
5. Tap **Next**.
6. Select if you want to show POIs on 2D and 3D views.
7. Tap **Done**.

To change the POI categories that are shown on the map, do the following:

1. Tap **View map** in the Main menu.
2. Tap the **Details** button.
3. Tap **Points of Interest (POIs)** to show POIs on the map.
4. Tap **Choose POIs**.
5. Select which POIs you want to be shown on the map.
6. Tap **Done** two times to return to the map.
Favorites

About Favorites
Favorites provide an easy way to select a location without the need to enter the address. They do not need to be favorite places, they can simply be seen as a collection of useful addresses.

Creating a Favorite
You can create a Favorite from one of the following locations in TomTom Nav App:

- Using the Manage favorites button in the Main menu to open the Manage Favorites screen.
- From a location selected on the map.

To create a Favorite using the Manage Favorites screen, do the following:

1. Tap the Add button.
   The Add as Favorite menu appears showing the buttons listed below. Use a button to find a Favorite.
2. Give your Favorite a name that is easy to remember.
   TomTom Nav App will always suggest a name. If you want to enter your own name, delete the suggested name and enter a new one. You can always change the name later.
3. Tap Next to save the Favorite.

</table>
Tap this button to use a Point of Interest (POI) as a Favorite.

Point of Interest

Tap this button to use your current location as a Favorite.

My current location

Tap this button to select a point on the map as a Favorite.

Point on map

Using a Favorite

You can use a Favorite as a way of navigating to a place without having to enter the address. To navigate to a Favorite, do the following:

1. Tap the screen to show the Main menu.
2. Tap Drive to.
3. Tap Favorite.
4. Select a Favorite from the list.
   TomTom Nav App calculates the route for you.
5. Tap Select.
6. Tap Go!
   TomTom Nav App starts to guide you to your destination using spoken instructions and on-screen directions.

Changing the name of a Favorite

To change the name of a Favorite, do the following:

1. Tap the screen to show the Main menu.
2. Tap Settings.
3. Tap Manage favorites.
4. Tap the Favorite you want to rename.
   The information screen opens.
5. Tap Rename, then enter the new name for the Favorite.
6. Tap Next.
   The Favorite is renamed.

Deleting a Favorite

Delete a Favorite as follows:
1. Tap the screen to show the Main menu.
2. Tap Settings.
3. Tap Manage favorites.
4. Tap the Favorite you want to delete.
   The information screen opens.
5. Tap the Delete button. Tap Yes to confirm you want to delete it.

Important Safety Notices and Warnings

Global Positioning System

The Global Positioning System (GPS) is a satellite-based system that provides location and timing information around the globe. GPS is operated and controlled under the sole responsibility of the Government of the United States of America, which is responsible for its availability and accuracy. Any changes in GPS availability and accuracy, or in environmental conditions, may impact the operation of this navigation system. TomTom does not accept any liability for the availability and accuracy of GPS.

Use with care

You must always drive with due care and attention, even when using TomTom navigation.
