Installing in your car

Your TomTom GPS navigation device has an integrated mount. See the printed installation instructions included with your product for more information.

1. Make sure that both the suction cup on your mount and your windscreen are clean and dry.
2. Press the suction cup of the mount firmly against the windscreen on an area where the glass is flat.
   
   **Important**: Place the mount so that it does not interfere with your view of the road or of any of the controls in your car.

3. Turn the rubber grip near the base of the mount in a clockwise direction until you feel it lock into place.
4. Plug the USB car charger into the power supply on your dashboard.
5. Connect the USB cable to the car charger and your TomTom device.

Your navigation device is now installed. The next step is to switch it on and answer a few set-up questions.

Switching on and off

To switch on your navigation device, press and hold the On/Off button until you see the start-up screen. The first time you switch on your device, you have to hold the button down for up to 15 seconds.

Setting up

**Important**: Take care to select the correct language as the language you choose will be used for all text on the screen.

When you first switch on your device, you have to answer a few questions to set up the device. Answer the questions by tapping the screen.

GPS reception

When you first start your TomTom GPS navigation device, the device may need a few minutes to determine your GPS position and show your current position on the map. In future, your position will be found much faster, usually within a few seconds.

To ensure good GPS reception, you should use your device outdoors and keep your device upright. Large objects such as tall buildings can sometimes interfere with reception. GPS reception can also be affected if the device is placed flat on a surface or held flat in your hand.
About MyTomTom

MyTomTom helps you manage the contents and services of your TomTom GPS navigation device, as well as giving you access to the TomTom community. You log in to MyTomTom on the TomTom website. It is a good idea to frequently connect your navigation device to MyTomTom to ensure you always have the latest updates and maps.

**Tip:** We recommend using a broadband internet connection whenever you connect your navigation device to MyTomTom.

Setting up MyTomTom

To set up MyTomTom on your computer, do the following:

1. Connect your computer to the internet.
2. Start a browser and go to tomtom.com/getstarted.
3. You may have to select your country to continue.
4. Click **Get Started**.
5. On the left hand side, click **Download MyTomTom**.
   
   *Your browser downloads the MyTomTom support application, which you need to install on your computer in order to connect your device to MyTomTom. Follow the instructions on the screen if you are asked questions while downloading.*

6. When prompted, connect your device to your computer using the USB cable. Then switch your device on.

**Important:** You should plug the USB cable directly into a USB port on your computer and not into a USB hub or USB port on a keyboard or monitor.

Once the MyTomTom support application is installed, you can access MyTomTom from the notification area on your desktop.

**Tip:** When you connect your navigation device to your computer, MyTomTom tells you if there are any updates for your device.
Device not starting

In rare cases, your TomTom GPS navigation device may not start correctly or may stop responding to your taps.

First, check that the battery is charged. To charge the battery, connect your device to the car charger. It can take up to 2 hours to fully charge the battery.

If this does not solve the problem, you can reset the device. To do this, press and hold the On/Off button until you hear the drum sound and your device restarts. This can take 30 seconds or more.

Charging your device

The battery in your TomTom GPS navigation device charges when you connect it to the car charger or to your computer.

Important: You should plug the USB connector directly into a USB port on your computer and not into a USB hub or USB port on a keyboard or monitor.

Take care of your navigation device

It is important to take care of your device:

- Do not open the casing of your device under any circumstances. Doing so may be dangerous and will invalidate the warranty.
- Wipe or dry the screen of your device using a soft cloth. Do not use any liquid cleaners.
Positioning the mount

Consider carefully where to attach the mount in your car. The mount should not block or interfere with any of the following:

- Your view of the road
- Any of the controls in your car
- Any of your mirrors
- Any airbags

When your navigation device is in the mount, you should be able to reach the device easily without leaning or stretching. You can attach the mount to the windscreen or side window or you can use a Dashboard Mount Disk to attach the mount to your dashboard. The following diagrams show where you can safely attach the mount.

TomTom also offers alternative mounting solutions for your TomTom navigation device. For more information about Dashboard Mount Disks and alternative mounting solutions, go to tomtom.com/en_in/products/accessories.

Safety settings

We recommend using the safety settings to make your driving as safe as possible.

These are some of the options included in the safety settings:

- Show essential menu buttons while driving
- Show safety reminders
- Warn when driving faster than allowed

If your device supports voice control, you can also drive more safely by using voice control to control your navigation device.
Planning a route

Making your first trip

**Important**: For your safety and to avoid distractions while you are driving, you should always plan a route before you start driving.

To plan a route on your TomTom GPS, do the following:

1. Tap the screen to open the Main menu.
2. Tap **Navigate to**.
3. Tap **Street Address**.
4. Enter the locality, city name or code.

**Tip**: Navigating using codes is explained later in this guide.
When the correct locality or city appears in the list, tap the name to select it.

5. At this point you can do one of the following:
   - Tap Street name to navigate to a house address.
   - Tap Landmark or POI to navigate to a Landmark or POI.
   
   See the sections below to find out how to navigate to each type of location.

Navigating to a house address
1. Tap Street name in the Find menu.

2. Type in a street name, a sector, a block or a pocket.
   When the correct search result appears in the list, tap the name to select it.
3. Enter the house number and tap **OK**.

4. When the route is shown, tap **Done**.

Your TomTom GPS starts to guide you to your destination, using spoken instructions and on-screen directions.

**Navigating using landmarks or Points of Interest (POIs)**

1. Tap **Landmark or POI** in the **Find** menu.

2. Enter the landmark or POI name.
   - When the correct landmark or POI appears in the list, tap the name to select it.
   - The location is shown on a 1km x 1km area of the map.
Tip: Landmarks include chowks. Chowks are named crossings of two or more streets.

3. After you have selected a landmark or POI, tap the left and right arrows to see the next POI in the same search on the map.

4. You can also use this map to explore the area around this point and select a new destination. Use the zoom buttons to zoom in and out. To move the map, touch the screen and drag your finger across the screen.
   Tap anywhere on a street to place the cursor there and to navigate to that point. The road changes colour when you select it and you see information about the newly selected area.
   Tap What's nearby to see a list of landmarks and POIs nearby. Tap any entry from the list to move the cursor to that place. You can repeat this as many times as you need to in order to set your destination correctly.
Tap **Select** to continue once you have set your destination or tap **Back** to enter another landmark or POI.

5. When the route is shown, tap **Done**.

Your TomTom GPS starts to guide you to your destination, using spoken instructions and on-screen directions.

**Navigating to a location using a code**

In countries where roads and houses have no names or addresses, you can use a mapcode instead. A mapcode represents a location. Every location on Earth can be represented by a mapcode. Mapcodes are short, easy to recognise, remember and communicate. They are precise to a few metres, which is good enough for every-day use.

Go to [mapcode.com](http://mapcode.com) for instructions on how to find out the mapcode for a location.

To navigate using a code, do the following:
1. Tap **Navigate to** in the **Main Menu**.

2. Tap **Street address**.

3. Enter your full or partial mapcode or a postcode.

4. When the route is shown, tap **Done**.

   Your TomTom GPS starts to guide you to your destination, using spoken instructions and on-screen directions.
About mapcodes

In countries where roads and houses have no names or addresses, you can use a mapcode instead. A mapcode represents a location.

Every location on Earth, including those in the sea like islands and oil rigs, can be represented by a mapcode. Mapcodes are short, and easy to recognise, remember and communicate. They are precise to a few metres, which is good enough for every-day use.

Go to mapcode.com for instructions on how to find the mapcode for a location.

Mapcodes are more precise and more flexible than the address on a business card. You can PICK the location you want to associate with your address, for example, the main entrance or entrance to a car park.

Tip: Your TomTom GPS shows the mapcode of your cursor when you view the map and when you tap Where am I in the Help menu.

Route summary

The route summary shows an overview of your route, the remaining distance to your destination and the remaining estimated journey time.

To view the route summary, tap the right-hand panel on the status bar in the Driving view or tap View route in the Main Menu and then tap Show route summary.

For more information about the route, tap Details. To plan a different route, tap Change route.
Selecting a route type

Every time you plan a route, you can choose to be asked about the type of route you want to plan. To do this, tap Settings followed by Route planning. Tap Route types and then tap Ask me every time I plan.

The types of route you can choose from are as follows:

- **Fastest route** - the route which takes the least time.
- **Eco route** - the most fuel-efficient route for your journey.
- **Shortest route** - the shortest distance between the locations you set. This may not be the quickest route, especially if the shortest route is through a town or city.
- **Avoid motorways** - a route which avoids motorways.
- **Limited speed** - a route based on a maximum speed. When you choose this type of route, you enter a maximum speed. The route and estimated time of arrival are then planned based on the speed that you entered.

Frequent destinations

If you often make trips to the same destinations, you can set your TomTom GPS device to ask if you want to plan a route to one of these locations every time the device starts. This is faster than planning a route in the normal way.
Show my frequent destinations

You can set your TomTom GPS device to ask if you want to plan a route to one of your frequently visited destinations every time the device starts.

To change this setting, do the following:

1. Tap **Start up** in the Settings menu and then select **Ask for a destination**.
2. Tap **Yes**, then tap **Yes** again to begin entering information about the destination.
3. Select a symbol for the destination and tap **Done** to set the symbol, then tap **Yes**.

   **Tip:** To add new destinations, select one of the numbered symbols and enter a name for the new destination button.

4. Tap **Yes** and if required enter a new name, then tap **Done**.
5. Enter the address details in the same way you enter an address when planning a route, then tap **Done**.
6. If you want to set more destinations, repeat the steps above. Otherwise, tap **Done**.
7. You are asked if you want to change the start-up image.
8. If you want to change the image, tap **Yes** then follow the instructions shown on the screen. Otherwise, tap **No**.

Every time your device starts, you are asked if you want to plan a route. If you tap **Cancel**, the Driving View opens.

Using arrival times

You can set your TomTom GPS device to ask you if you need to arrive at a particular time when you plan a route.

Tap **Status bar** in the Settings menu, to enable or disable arrival time notifications.

To enable arrival time notifications, select **Leeway**.

**Status bar**

After planning a route, tap **YES** to enter a preferred arrival time.

Your device calculates your arrival time and shows you whether you will arrive on time.

You can also use this information to work out when you need to leave. If your device shows that you will arrive 30 minutes early, you can wait and leave in 30 minutes time, rather than arrive early.

Your arrival time is constantly recalculated during your journey. The status bar shows whether you will arrive on time or if you are going to be late, as shown below:

<table>
<thead>
<tr>
<th>Time Difference</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>+55 min</td>
<td>You will arrive 55 minutes before the arrival time you entered. If the estimated arrival time is more than five minutes before the time you entered, it is shown in green.</td>
</tr>
<tr>
<td>+3 min</td>
<td>You will arrive 3 minutes before the arrival time you entered. If the estimated arrival time is less than 5 minutes before the time you entered, it is shown in yellow.</td>
</tr>
</tbody>
</table>
You will arrive 19 minutes late.

If the estimated arrival time is later than the time you entered, it is shown in red.

**Navigation menu options**

When you tap **Navigate to** or **Drive to**, you can set your destination in many ways, not just by entering the address. The other options are listed below:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Home</strong></td>
<td>Tap this button to navigate to your Home location. You will probably use this button more than any other.</td>
</tr>
<tr>
<td><strong>Favourite</strong></td>
<td>Tap this button to select a Favourite as your destination.</td>
</tr>
<tr>
<td><strong>Street address</strong></td>
<td>Tap this button to select a street address as your destination.</td>
</tr>
<tr>
<td><strong>Recent destination</strong></td>
<td>Tap this button to select your destination from a list of places you have recently used as destinations.</td>
</tr>
<tr>
<td><strong>Landmark or POI</strong></td>
<td>Tap this button to select a landmark or POI as your destination.</td>
</tr>
<tr>
<td><strong>Point on map</strong></td>
<td>Tap this button to select a point on the map as your destination using the map browser.</td>
</tr>
<tr>
<td><strong>Latitude Longitude</strong></td>
<td>Tap this button to enter a destination using latitude and longitude values.</td>
</tr>
<tr>
<td><strong>Position of last stop</strong></td>
<td>Tap this button to select your last recorded position as your destination.</td>
</tr>
</tbody>
</table>
Planning a route in advance

You can use your TomTom GPS to plan a route in advance, selecting your starting point and your destination.

Here are some more reasons to plan a route in advance:

- Find out how long a journey is going to take before you start.
- Study the route of a journey you are planning.
- Check a route for someone who is coming to visit you and then explain the route to them in detail.

To plan a route in advance, follow these steps:

1. Tap the screen to bring up the Main menu.
2. Tap the arrow button to move to the next menu screen and tap Plan route.

This button is shown while there is no planned route on your TomTom GPS.

3. Select the starting point for your journey in the same way that you would select your destination.
4. Set the destination for your journey.
5. If Route planning settings are set to Ask me every time I plan, select the type of route you want to plan:
   - Fastest route - the route which takes the least time.
   - Eco route - the most fuel-efficient route for your journey.
   - Shortest route - the shortest distance between the locations you set. This may not be the quickest route, especially if the shortest route is through a town or city.
   - Avoid motorways - a route which avoids motorways.
   - Limited speed - a route for use by vehicles with a limited top speed.
6. Choose the date and time that you will make the journey you are planning.

Your TomTom GPS plans the route between the two locations you selected.

Viewing route information

You can access these options for the route you last planned by tapping View route in the Main Menu or the Details button on the route summary screen.

You can then select from the following options:

Show instructions

Tap this button for a list of all the turn instructions on the route.
This is very useful if you need to explain a route to someone else.

Show map of route

Tap this button to see an overview of the route using the map browser.
Tap this button to watch a demo of the journey. You can interrupt the demo at any time by tapping the screen.

**Show route demo**

Tap this button to open the route summary screen.

**Show route summary**

Tap this button to see a preview of your destination. You can navigate to a car park near your destination, and view any available information about your destination, for example, the phone number.

**Show destination**
Voice control

About voice control

**Note**: Voice control is not supported on all devices or in all languages.

Instead of tapping the screen to control your TomTom GPS device, you can use your voice to control your device.

For example, to increase the volume on your device, you can say "Increase volume".

To view the list of available commands, tap **Help** in the Main menu, tap **Product manuals** and then tap **What can I say**?

**Important**: Voice control requires a computer voice. When there is no computer voice installed and selected on your TomTom GPS device, this feature is not available.

To select a computer voice, tap **Voices** in the Settings menu, then tap **Change voice** and select a computer voice.

Using voice control

To switch on voice control and show the button in the Driving view, tap **Voice control** in the Settings menu and select **Enable voice control**.

To switch off voice control and remove the button from the Driving view, tap **Voice control** in the Settings menu and select **Disable voice control**.

The following example shows how to use voice control to plan a journey to your Home address:

1. Tap the microphone button in the Driving view to turn on the microphone.

   ![Microphone icon]

   You see a screen with examples of commands you can say.

   Tap **What can I say**? to see a full list of commands you can say. Alternatively, tap **Settings** in the Main menu, tap **Voice control** and then tap **What can I say**?

2. When you hear the beep, say a command of your choice. For example, you can say "Navigate home". Your device is only ready to listen after you hear the beep.

   While you are speaking the microphone monitor shows how well the device can hear your voice:

   - A green bar means the device can hear your voice.
   - A red bar means your voice is too loud for the device to recognise individual words.
   - A grey bar means your voice is too quiet for the device to recognise individual words.

   For some phrases, your device asks for confirmation.
**Tip:** For the best recognition of what you say, speak normally without trying to articulate words in an unnatural way. If there is excessive road noise, for example, you may need to speak in the direction of the microphone.

3. If the command is correct, say "Yes."
   If the command is incorrect, say "No" and repeat the command after you hear the prompt and beep again.

Your device plans a route from your current location to your destination.

**Tip:** To stop your device from listening out for further commands, say "Cancel". To go back one step, say "Back".
The Driving View

About the Driving View

When your TomTom GPS navigation device starts for the first time, you are shown the Driving View along with detailed information about your current position.

Tap the centre of the screen at any time to open the Main Menu.

You can choose the screen shown when you switch on your device by tapping Settings in the Main Menu, then tapping Start up.

The Driving View

1. Zoom button - tap the magnifying glass to show buttons for zooming in and out.
2. Quick menu - to turn on the quick menu, tap Make your own menu in the Settings menu.
3. Your current position.
4. Battery level indicator.
5. Microphone button for voice control.

Note: Points of Interest (POIs) can also be shown on the Driving View. To select which POIs are shown, tap Settings in the Main Menu, then tap Show POI on map. Select the POIs that you want shown on the map.

1. The time, your current speed and the speed limit, if known.

Note: Voice control is not supported on all devices or in all languages.
Tap this part of the status bar to switch between a 3D map and a 2D map.

7. Navigation instruction for the road ahead and the distance to next instruction. If the second instruction is less that 150m after the first instruction, you see it shown immediately instead of the distance.
   Tap this part of the status bar to repeat the last voice instruction and to change the volume. You can also tap here to mute the sound.

8. The remaining journey time, the remaining distance and your estimated arrival time.
   Tap this part of the status bar to open the Route Summary screen.

To change the information shown in the status bar, tap **Status bar** in the Settings menu.

**Important:** If you are travelling through areas with limited map information, you see only an arrow in the Driving View that shows you which direction to travel in.

### Driving View Symbols

- 💿 Sound muted - this symbol is shown when the sound has been muted. To turn the sound back on, tap the middle panel in the status bar.

- 🏎️ Battery - this symbol is shown when the battery level is low. When you see this symbol, you should charge your navigation device immediately.

- 🚀 Connected to computer - this symbol is shown when your navigation device is connected to your computer.

- 📞 Mobile phone not connected - this symbol is shown when the selected mobile phone is not connected to your device. You must have already established a connection to this phone.

**Note:** Hands-free calling is only supported on selected models.
Advanced Lane Guidance

About lane guidance

**Note:** Lane guidance is not available for all junctions or in all countries.

Your TomTom GPS helps you prepare for major and secondary road junctions and motorway exits by showing the correct driving lane for your planned route.

As you approach a junction or exit, the lane you need is shown on the screen.

Using lane guidance

There are two types of lane guidance:

- **Lane images**

Lane images are shown in a split-screen with lane guidance on the right and your current Driving View on the left.

To change the settings for lane images, tap **Settings** in the Main menu, then tap **Advanced settings**. You can choose to see a split-screen lane image, a full-screen lane image or you can switch off lane images altogether.

**Tip:** Tap anywhere on the screen to return to the Driving View.
- Instructions in the status bar

**Tip**: If no lane guidance is shown in the status bar and all lanes are highlighted, you can use any lane.
Changing your route

Making changes to your route
After you plan a route, you may want to change the route or even the destination. There are various ways to change your route without the need to completely replan the entire journey.

To change the current route, tap **Change route** in the Main menu:

![Change route](image)

**Tap this button to change the current route.**

This button is only shown while there is a planned route on your device.

### Change route menu

To change the current route or your destination, tap one of the following buttons:

![Calculate alternative](image)

**Calculate alternative**

Tap this button to find an alternative to the current route.

This button is only shown while there is a planned route on your TomTom GPS device.

This is a simple way to search for a different route to your current destination.

Your device calculates a new route from your current location, to reach your destination using completely different roads.

The new route is shown next to the original route so that you can select the route you want to use.

![Avoid roadblock](image)

**Avoid roadblock**

Tap this button while driving on a planned route, to avoid a roadblock or traffic congestion on the road ahead.

Your device will suggest a new route which avoids the roads on your current route for the selected distance.

If the roadblock or traffic congestion suddenly clears, tap **Recalculate route** to replan your original route.

**Important**: Be aware that when a new route is calculated, you might immediately be asked to turn off the current road.

![Change destination](image)

**Change destination**

Tap this button to change the current destination.

When you change the destination, you are shown the same options and asked to enter the new address in the same way as when you plan a new route.
Tap this button to avoid part of the current route.
You are shown a list of the street names on your route. When you tap one of the street names, your device calculates a detour to avoid the selected street. The route summary shows both the new route and your original route. Tap the panel on the right to select one of the routes and then tap **Done**.

If you do not want to use either of the routes shown in the route summary, tap **Change route** to find another way to change your route.

---

Tap this button to change your route by selecting a location you want to travel past, maybe so you can meet someone on the way.

When you select a location to travel past, you are shown the same options and asked to enter the new address in the same way as when you plan a new route.

Your device calculates the route to your destination via the selected location.

The selected location is shown on the map using a marker.

You receive a warning when you reach your destination and when you travel past a marked location.
View map

About viewing the map

You can view the map in the same way as you might look at a traditional paper map. The map shows your current location and many other locations such as Favourites and POIs.

To view the map in this way, tap *View map* or *View route* in the Main menu.

You view different locations on the map by moving the map across the screen. To move the map, touch the screen and drag your finger across the screen. If your device supports gestures, you can also zoom in and out by touching the screen with your thumb and forefinger and sliding them together and apart.

To select a location on the map, tap the location on the map. The cursor highlights the location and displays useful information about the location in an information panel. Tap the information panel to create a Favourite or plan a route to that location.

View map

1. The scale bar.
2. The cursor with street name balloon.
   - Tap the button in the street name balloon to open the cursor menu. You can then navigate to the cursor position, make a Favourite of the cursor position, or find a Point of Interest near the cursor position.
3. A marker.
A marker shows the distance to a location. Markers are coloured as follows:

- **Blue** - points to your current location. If you lose your GPS signal, the marker is grey and shows your last known location.
- **Orange** - points to your home location.
- **Red** - points to your destination.

Tap a marker to centre the map on the location pointed to by the marker.

You can also set your own marker. Tap the cursor button, then tap **Set marker position** to place a green marker at the cursor position.

To turn markers off, tap **Options**, then **Advanced** and clear the **Markers** checkbox.

4. The Options button.
5. The Find button.
   - Tap this button to find specific addresses, favourites or Points of Interest.
6. The mapcode for the cursor location.
   - For more information about mapcodes, see [About mapcodes](#).
7. The zoom bar.
   - Zoom in and out by moving the slider.

**Options**

Tap the **Options** button to set the information shown on the map and show the following information:

- **Names** - select this option to show street and city names on the map.
- **Points of interest** - select this option to show POIs on the map. Tap **Choose POIs** to choose which POI categories are shown on the map.
- **Favourites** - select this option to show your Favourites on the map.

Tap **Advanced** to show or hide the following information:

- **Markers** - select this option to enable markers. Markers point to your current location (blue), your home location (orange) and your destination (red). The marker shows the distance to the location.
  - Tap a marker to centre the map on the location which the marker is pointing to.
  - To create your own marker, tap the cursor button. Then tap **Set marker position** to place a green marker at the cursor position.
  - To disable markers, tap **Options**, then tap **Advanced** and unselect **Markers**.
- **Coordinates** - select this option to show GPS coordinates in the lower left corner of the map.

**Cursor menu**

The cursor can be used to do more than highlight a location on the map.

Position the cursor on a location on the map, then tap the arrow and then tap one of the following buttons:
Navigate there
Tap this button to plan a route to the cursor position on the map.

View location
Tap this button to view information about the location on the map such as the address.

Set marker position
Tap this button to create your own green marker and place it at the cursor position.
If a green marker exists, this button changes to **Delete marker**.

Find POI nearby
Tap this button to find a POI near the cursor position on the map.
For example, if the cursor currently highlights a restaurant location on the map, you can search for a nearby parking garage.

Correct location
Tap this button to make a map correction for the cursor position on the map.
You can make the correction only on your own map or you can share the correction with the TomTom Map Share community.

Add as Favourite
Tap this button to create a Favourite at the cursor position on the map.

Add as POI
Tap this button to create a POI at the cursor position on the map.

Centre on map
Tap this button to centre the map on the cursor position.

**Note:** Hands-free calling is not supported on all devices.

Call...
Tap this button to call the location at the cursor position.
This button is only available if your TomTom GPS device has the phone number for the location.
The phone numbers for many POIs are available on your TomTom GPS device.
You can also call phone numbers of your own POIs.
Map corrections

About Map Share
Map Share helps you correct map errors. You can correct several types of map error.

To make corrections to your own map, tap **Map corrections** in the Settings menu.

**Note:** Map Share is not available in all regions. For more information, go to tomtom.com/mapshare.

Correcting a map error

**Important:** For safety reasons, do not enter the full details of a map correction while you are driving. Mark the location of the map error instead and enter the full details later.

To correct a map error, do the following:

1. Tap **Map corrections** in the Settings menu.

2. Tap **Correct a map error**.
3. Select the type of map correction you want to apply.
4. Select how you want to select the location.
5. Select the location. Then tap **Done**.
6. Enter the details of the correction. Then tap **Done**.
7. Select whether the correction is temporary or permanent.
8. Tap **Continue**.
   The correction is saved.

Types of map correction

To make a correction to your map, tap **Map corrections** in the Settings menu, then tap **Correct a map error**. There are several types of map correction available.

(Un)block street

Tap this button to block or unblock a street. You can block or unblock the street in one or both directions.

For example, to correct a street near to your current location, do the following:

1. Tap **(Un)block street**.
2. Tap **Near you** to select a street near your current location. Alternatively, you can select a street by name, a street near your Home loca-
tion or a street on the map.

3. Select the street or section of a street you want to correct by tapping it on the map.
   The street you select is highlighted and the cursor shows the name of the street.

4. Tap **Done**.
   Your device shows the street and whether the traffic is blocked or allowed in each direction.

5. Tap one of the direction buttons to block or unblock the flow of traffic in that direction.

6. Tap **Done**.

---

**Reverse traffic direction**

Tap this button to correct the traffic direction of a one-way street, where the direction of traffic is different from the direction shown on your map.

*Note:* Reverse traffic direction only works for one-way streets. If you select a two-way street you will be given the chance to block/unblock the street rather than changing the direction.

---

**Edit street name**

Tap this button to change the name of a street on your map.

For example, to rename a street near to your current location:

1. Tap **Edit street name**.
2. Tap **Near you**.
3. Select the street or section of a street you want to correct by tapping it on the map.
   The street you select is highlighted and the cursor shows the name of the street.
4. Tap **Done**.

*Tip:* If the highlighted section is not correct, tap **Edit** to change individual road sections.

5. Type the correct street name.
6. Tap **Continue**.
Tap this button to change and report incorrect road turn restrictions.

Change turn restrictions

Tap this button to change and report the road speed limit.

Change road speed

Tap this button to add or remove a roundabout.

Add or remove roundabout

Tap this button to add a new Point of Interest (POI).
For example to add a new restaurant near to your current location:

1. Tap Add missing POI.
2. Tap Restaurant in the list of POI categories.
3. Tap Near you.
   You can select the location by entering the address or by selecting the location on the map. Select Near you or Near home to open the map at your current location or at your Home location.
4. Select the location of the missing restaurant.
5. Tap Done.
6. Type the name of the restaurant then tap Next.
7. If you know the telephone number of the restaurant you can type it, then tap Next.
   If you don't know the number, just tap Next without typing a number.
1. Tap Continue.

Tap this button to edit an existing POI.
You can use this button to make the following changes to a POI:
- Delete the POI.
- Rename the POI.
- Change the telephone number of the POI.
- Change the category that a POI belongs to.
- Move the POI on the map.

Edit POI

Tap this button to enter a comment about a POI. Use this button if you cannot edit the error with the POI using the Edit POI button.

Comment on POI
Correct house number
Tap this button to correct the location of a house number. Enter the address that you wish to correct and then indicate on the map the correct location of that house number.

Existing street
Tap this button to edit an existing street. Once you have selected the street, you can select an error to report. You can select more than one type of error for a street.

Missing street
Tap this button to report a missing street. You have to select the start and end points of the missing street.

Locality or city
Tap this button to report an error about a locality, city, town or village. You can report the following types of error:
- Locality or city is missing
- Wrong locality or city name
- Alternative locality or city name
- Other

Motorway entrance/exit
Tap this button to report an error about a motorway entrance or exit.

Postcode
Tap this button to report an error about a postcode.

Other
Tap this button to report other types of corrections. These corrections are not immediately applied to your map but are saved in a special report.
You can report missing streets, errors in motorway entrances and exits and missing roundabouts. If the correction you want to report is not covered by any of these report types, enter a general description then tap Other.
About sounds and voices

Your TomTom GPS device uses sound for some or all of the following:

- Driving directions and other route instructions
- Warnings that you set
- Hands-free phone calls

**Note:** Hands-free calling is not supported on all navigation devices.

There are two types of voice available for your device:

- **Computer voices**
  - Computer voices are generated by your device. They provide route instructions and read aloud city and street names, traffic and other useful information.
- **Human voices**
  - These are recorded by an actor and only provide route instructions.

**Note:** Not all devices have computer voices.

About computer voices

Your TomTom GPS device uses text-to-speech technology and computer voices to read the street names on your map as it guides you on your route.

The computer voice analyses the whole phrase or sentence before speaking, to ensure that the sentence sounds as close as possible to natural speech.

Computer voices can recognise and pronounce foreign towns and street names. For example, the English computer voice can read and pronounce French street names but pronunciation may be not completely accurate.

Selecting a voice

To select a different voice on your TomTom GPS device, either tap **Change voice** in the **Settings** menu or tap **Voices**, then tap **Change voice** and select the required voice.

Changing the volume level

You can change the volume on your TomTom GPS device in several ways.

- In the Driving view.
  
  Tap the central panel on the status bar and move the slider to adjust the volume. The last route instruction is played so you can hear the new volume level.

- In the Settings menu.
  
  Tap **Settings** in the Main menu, then tap **Volume** and move the slider to adjust the volume. Tap **Test** to listen to the new volume level.
Automatic volume control

To set your TomTom GPS device to automatically adjust the volume, do the following:

1. Tap **Settings** in the Main menu.
2. Tap **Volume**.
3. Select **Link volume to car speed** to automatically adjust the volume inside the car in response to changes in the speed of your driving.
4. Tap **Done**.
About Settings

You can change the way your TomTom GPS device looks and behaves. Most of the settings on your device can be accessed by tapping **Settings** in the Main menu.

**Note:** Not all settings described here are available on all devices.

### 2D/3D settings

Tap this button to set the default view of the map. To switch between 2D and 3D views while driving, tap the left side of the status bar in the Driving View.

It is sometimes easier to view the map from above, such as when navigating a complex road network.

The 2D view shows a two dimensional view of the map as though viewed from above.

The 3D view shows a three dimensional view of the map as though you are driving through the landscape.

The following buttons are available:

- **In 2D view: rotate map in direction of travel** - tap this button so the map is rotated automatically with the direction you are travelling always at the top.
- **Switch to 3D view when following a route** - tap this button to show the map automatically in 3D view when you are following a route.

### Advanced settings

Tap this button to select the following advanced settings:

- **Show house number before street name** - when this setting is selected, addresses are shown with the house number followed by the street name, such as 10 Downing Street.
- **Show street names** - when this setting is selected, street names are shown on the map in the Driving View. You do not need to select this option when your TomTom GPS is set to read aloud street names using a computer voice.
- **Show next street name** - when this setting is selected, the name of the next street on your route is shown at the top of the Driving View.
- **Show current street name on map** - when this setting is selected, the name of the street you are on is shown at the bottom of the Driving View.
- **Show location preview** - when this setting is selected, a graphical preview of your destination is shown during route planning.
- **Show lane images** - when this setting is selected, a graphical view of
the road ahead shows which lane you need when you approach a junction or motorway exit. You can choose to see a split-screen lane image, a full-screen lane image or you can switch off lane images altogether. This feature is not available for all roads.

- **Show tips** - this setting switches tips on and off.
- **Show mapcode** - this setting switches the mapcode on and off when viewing the map.
- **Enable automatic zooming in 2D view**
- **Enable automatic zooming in 3D view**
- **Automatically adjust clock for time zone** - when this setting is selected, your clock is automatically adjusted for your time zone.

**Battery saving**

To change the power saving settings, tap this button on your device.

**Brightness**

Tap this button to set the brightness of the screen. Move the sliders to adjust the brightness level.

To view the map and menus in day or night colours, tap **Use day colours** or **Use night colours** in the Settings menu.

**Car symbol**

Tap this button to select the car symbol that shows your current location in the Driving view.

**Clock**

Tap this button to select the time format. As soon as you have a GPS fix, the time will be set automatically. If you don't have a GPS fix, you can choose to set the time manually.

**Disable Bluetooth® / Enable Bluetooth®**

Tap this button on the **Connections** menu to disable or enable Bluetooth® functionality on your TomTom GPS.

In some places, such as hospitals and aeroplanes, you are required to turn Bluetooth® off on all electronic devices.
Favourites

Tap this button to add, rename or delete Favourites.
Favourites provide an easy way to select a location without the need to enter the address. They do not need to be favourite places, they can simply be seen as a collection of useful addresses.
To create a new Favourite, tap Add. Then enter the location address in the same way that you enter an address when you plan a route.

To view or change an existing Favourite, tap one of the items in the list. To see more Favourites on the map, tap the left or right buttons.

Flight mode

Tap this button on the Connections menu to enable or disable all wireless connections on your navigation device, such as Bluetooth and GSM mobile communications.
This is important when flying or when entering areas, such as a hospital, where you must turn off devices that transmit radio signals.
GPS status

Tap this button to see the current status of GPS reception on your device.

Home location

Tap this button to set or change your Home location. You enter the address in the same way as you do when you plan a route.

Your Home location provides an easy way to plan a route to an important location.

For most people, your Home location will be your home address. However, you might prefer to set the location to another regular destination, such as your workplace.

Keyboard

Tap this button to select the keyboards that will be available for your use and the layout of the Latin keyboard.

You use the keyboard to enter names and addresses, such as when you plan a route or search for the name of a town or a local restaurant.

Language

Tap this button to change the language used for all the buttons and messages you see on your device.

You can choose from a wide range of languages. When you change the language, you are also given the opportunity to change the voice.

Make your own menu

Tap this button to add up to six buttons to your own personalised menu.

If there are only one or two buttons in your menu, both buttons are shown in the Driving view.

If you have three or more buttons in your menu, then a single button is shown in the Driving view which opens your menu when tapped.

Manage POIs

Tap this button to manage your own Point of Interest (POI) categories and locations.

You can set your TomTom GPS device to let you know when you are near to selected POI locations. For example, you could set the device to let you know when you are approaching a petrol station.

You can create your own POI categories and add your own POI locations to these categories.

You can, for example, create a new POI category called Friends. You could then add all your friends' addresses as POIs in this new category.
Tap the following buttons to create and maintain your own POIs:

- **Add POI** - tap this button to add a location to one of your own POI categories.
- **Warn when near POI** - tap this button to set your device to warn you when you are near selected POIs.
- **Delete POI** - tap this button to delete a POI.
- **Edit POI** - tap this button to edit one of your own POIs.
- **Add POI category** - tap this button to create a new POI category.
- **Delete POI category** - tap this button to delete one of your own POI categories.

**Map colours**

Tap this button to select the colour schemes for day and night map colours.

Tap **Search** to search for a colour scheme by typing the name.

**Me and my device**

Tap this button to find technical information about your TomTom GPS, and to select whether you want to share information with Tomtom.

A menu opens with the following options:

- **About my device**
  - Tap this button to find technical information about your TomTom GPS, such as the device serial number, application version and the map version.
- **My information**
  - Tap this button to change whether you want to share information with TomTom.

**Operate left-handed / Operate right-handed**

Tap this button to make it easier for right- or left-handed operation. This will affect items such as the zoom bar when you are viewing the map.
Phone settings

Tap this button in the Connections menu to open the Phones menu. For more information on connecting your phone and making hands-free calls, see **Hands-Free calling**.

Route planning

Tap the **Route planning** button to set the way your TomTom GPS calculates the routes that you plan. The settings for planning consist of several options that are spread over several screens. Each setting is described below.

**Route types**

Set the type of route you want your TomTom GPS to calculate and if you want to be asked every time you plan a route.

Set whether you want to avoid motorways or not.

Set what happens when a faster route is found using the replanning settings.

Set whether you want to be warned if your route passes through an area where your map contains only limited information.

**Toll road, ferry, carpool lanes and unpaved road settings**

Set how your TomTom GPS should manage each of these four road features when the device calculates a route.

Carpool lanes are sometimes known as High Occupancy Vehicle Lanes and are not present in every country. To travel on these lanes, you may need to have more than one person in the car, for example, or the car may need to use environmentally-friendly fuel.

**Route summary**

Set whether you want the route summary screen to close automatically after you plan a route. If you select **No**, then you will need to tap **Done** to close the route summary screen every time you plan a route.

Reset factory settings

Tap this button to delete all your personal settings and restore the standard factory settings to your TomTom GPS device.

This is not a software update and will not affect the version of the software application installed on your device.

**Important:** This feature deletes all your personal settings!

If you want to keep your personal information and settings, you should perform a full backup of your device before you reset the device. You can
then restore all your personal information and settings after you reset the device.
This includes items such as your Home and Favourite locations, your personal menu and your POI categories and POI locations.

Safety settings
Tap this button to select the safety features you want to use on your device.

Show POI on map
Tap this button to select the types of Point of Interest (POI) you want to see on the map.
1. Tap Show POI on map in the Settings menu.
2. Select the POI categories you want to be shown on the map.
   Tap Search and use the keyboard to search for a category name.
3. Select whether you want POIs to be shown in 2D or 3D views of the map.
4. Tap Done.
Point of Interest locations are shown on the map as symbols.

Start up
Tap this button to set what happens when your device starts.

Status bar
Tap this button to select the information you want to see on the status bar:
- **Horizontal** - show the status bar at the bottom of the Driving view.
- **Vertical** - show the status bar on the right-hand side of the Driving view.
- **Maximum speed**

**Important:** The speed limit is shown next to your current speed. If you drive faster than the speed limit, you see a warning indicator in the status bar, for example the status bar pane turns red.

Information about speed limits is not available for all roads.
- **Current time**
- **Remaining distance** - the distance to your destination.
- **Leeway** - your device shows how late or early you will arrive, compared with your preferred arrival time that was set when you planned
the route.

Switch map

Tap this button to select the map you want to use for route planning and navigation.

Although you can store more than one map on the device, you can only use one map at a time for planning and navigation.

To switch from the current map to plan a route in another country or region, simply tap this button.

**Note:** The first time you switch to a map, you may need to connect to your MyTomTom account and activate the map.

Turn off voice guidance / Turn on voice guidance

Tap this button to switch off voice guidance. You will no longer hear spoken route instructions but you will still hear information such as traffic information and warnings.

Voice guidance is also switched off if you tap Turn off sound in the Settings menu.

**Note:** If you change the voice on your device, then voice guidance is automatically switched on for the new voice.

Tap this button to switch on voice guidance and hear spoken route instructions.

Units

Tap this button to set the units used on your device for features such as route planning.

Use night colours / Use day colours

Tap this button to reduce the brightness of the screen and display the map in darker colours.

When driving at night or when driving through a dark tunnel, it is easier to view the screen and less distracting for the driver if the brightness of the screen is dimmed.

**Tip:** Your device can switch between day and night colours depending on the time of day. To automatically switch between night and day colours, tap Brightness in the Settings menu and select Switch to night colours when dark.
Tap this button to increase the brightness of the screen and display the map in brighter colours.

Use day colours

Voices

Tap this button to change the voice that gives spoken directions and other route instructions.

A wide range of voices are available. There are computer voices which can read street names and other information directly from the map and there are human voices which have been recorded by actors.

Tap this button to set the type of spoken directions and other route instructions your device will read aloud.

Voice settings

Volume

Tap this button to set the volume level for your device. Move the slider to change the volume.

Volume
Points of Interest

About Points of Interest
Points of Interest or POIs are useful places on the map.
Here are some examples:

- Landmarks
- Restaurants
- Hotels
- Museums
- Parking garages
- Petrol stations

**Tip:** Landmarks include most residential and commercial buildings as well as gated communities, toll gates, monuments, cemeteries, tourist attractions etc.

Creating POIs

**Tip:** For help on managing third party POIs, search for "Third party POIs" at: tomtom.com/support.

1. Tap the screen to open the Main menu.
2. Tap **Settings**.
3. Tap **Manage POIs**.
4. If there are no POI categories or the one you want to use does not exist, tap **Add POI category** and create a new category.

![Add POI Category Icon] Every POI must be assigned to a POI category. This means you need to have created at least one POI category before you can create your first POI.

You can only add POIs to POI categories you have created.

For more information on creating POI categories, read **Managing POIs**.

5. Tap **Add POI**.
6. Select the POI category you want to use for the new POI.
7. Tap a button to enter the POI address in the same way that you plan a route.

The POI is created and saved in the selected category.

![Home Icon] Tap this button to set your Home location as a POI. This is useful if you decide to change your Home location, but first want to create a POI using the current Home address.
Using POIs to plan a route

When you plan a route, you can use a POI for the destination.

The following example shows how to plan a route to a car park in a city:

1. Tap **Navigate to** or **Drive to** in the Main menu.
2. Tap **Point of Interest**.
3. Tap **POI in locality or city**.
Tip: The last POI you viewed on your TomTom GPS is also shown in the menu.

4. Enter the name of the locality or city and select it when it is shown in the list.
5. Tap the arrow button to expand the list of POI categories.

Tip: If you already know the name of the POI you want to use, you can tap Search by name to enter the name and select this location.

6. Scroll down the list and tap Car park.
7. The car park closest to your destination is shown at the top of the list.
8. The following list explains the distances shown next to each POI. How the distance is measured varies depending on how you initially searched for the POI:
   - POI near you - distance from your current location
   - POI in city - distance from the city centre
   - POI near Home - distance from your Home location
   - POI along route - distance from your current location
   - POI near destination - distance from your destination
9. Tap the name of the car park you want to use and tap Done when the route has been calculated.

Your TomTom GPS starts to guide you to the car park.

Showing POIs on the map
You can select the types of POI locations you want to see on your maps.
1. Tap Show POI on map in the Settings menu.
2. Select the categories you want to be shown on the map.
3. Tap Done.
4. Select whether you want to see POI locations in 2D and 3D views of the map.
5. Tap Done.

The types of POI you have selected are shown as symbols on the map.

Calling a POI

Note: Hands-free calling is not supported on all navigation devices.

Many of the POIs on your TomTom GPS device include phone numbers. This means that if your device supports hands-free calling, you can use your device to call the POI as well as planning a route to the location of the POI.

For example, you can search for a cinema, call to book a ticket and plan a route to the cinema, and all using your TomTom GPS device.

1. Tap the phone button in the Driving View.
   If the button is not visible in the Driving View, tap Make your own menu in the Settings menu and select Call... to display the button in the Driving View.
2. Tap Point of Interest.
3. Select how you want to search for the POI.
   For example, if you want to search for a POI on your route, tap POI along route.
4. Tap the type of POI you want to call.
For example, if you want to call a cinema to reserve a ticket, tap **Cinema** and then select the name of the cinema you want to call. Then tap **Call** or **Dial** to make the phone call.

Your TomTom GPS device uses your mobile phone to call the POI.

**Setting warnings for POIs**

You can set a warning sound to be played when you approach a selected type of POI, such as a petrol station.

The following example will show how to set a warning sound to be played when you are 250 metres from a petrol station.

1. Tap **Manage POIs** and then **Warn when near POI** in the Settings menu.
2. Scroll down the list and tap **Petrol station**.
   
   **Tip:** To remove a warning, tap on the category name and then tap **Yes**. POI categories which have been set with a warning have a sound symbol next to the category name.

3. Set the distance as 250 metres and tap **OK**.
4. Select **Sound effect** and then tap **Next**.
5. Select the warning sound for the POI and then tap **Next**.
6. If you only want to hear the warning when the POI is directly on a planned route, select **Warn only if POI is on route**. Then tap **Done**.

   The warning is set for the selected POI category. You will hear a warning sound when you are 250 metres from a petrol station on your route.

**Manage POIs**

Tap **Manage POIs** to manage your POI categories and locations.

You can set your TomTom GPS device to let you know when you are near to selected POI locations. In this way you could, for example, set the device to let you know when you are approaching a petrol station.

You can create your own POI categories and add your own POI locations to these categories. This means you can, for example, create a new POI category called Friends. You could then add all your friends' addresses as POIs in this new category.

Tap the following buttons to create and maintain your own POIs:

- **Add POI** - tap this button to add a location to one of your own POI categories.
- **Warn when near POI** - tap this button to set your device to warn you when you are near selected POIs.
- **Delete POI** - tap this button to delete one of your own POI categories.
- **Edit POI** - tap this button to edit one of your own POIs.
- **Add POI category** - tap this button to create a new POI category.
- **Delete POI category** - tap this button to delete one of your own POI categories.
Help

About getting help

Tap Help in the Main menu to navigate to emergency services centres and other specialist services. If your device supports hands-free calling and your phone is connected to your device, you can contact emergency services directly by phone.

For example, if you are involved in a car accident, you could use the Help menu to find and call the nearest hospital and tell them your exact location.

Tip: If you do not see the Help button in the Main menu, tap Settings and then Safety settings. Clear the checkbox for Show only essential menu options while driving.

Using Help to phone a local service

Note: Hands-free calling is not supported on all devices.

To use Help to locate a service centre, contact the centre by phone and navigate from your current location to the centre, do the following:

1. Tap the screen to show the Main Menu.
2. Tap Help.
3. Tap Phone for help.
4. Select the type of service you require, for example, Nearest hospital.
5. Select a centre from the list, the nearest is shown at the top of the list.

   Your TomTom GPS shows your position on the map, relative to the nearest landmark, along with a description of the location. This helps you explain where you are while making a call.

   If your navigation device supports hands-free calling and a phone is connected to your device, your device automatically dials the phone number. If no phone is connected, the phone number is displayed for you to call.

6. To navigate your way to the centre by car, tap Navigate there. If you are on foot, tap Walk there.

Your TomTom GPS starts guiding you to your destination.

Help menu options

Note: In some countries, information may not be available for all services.

Tap this button to find the contact details and location of a service centre.

Note: Hands-free calling is not supported on all devices.
Tap this button to navigate your way by car to a service centre.

**Drive to help**

Tap this button to navigate your way on foot to a service centre.

**Walk to help**

Tap this button to see your current location on the map in relation to the nearest landmark. Your current latitude and longitude are shown.

**Where am I?**

Tip: The mapcode for the cursor location is also shown.

Tap this button to read a selection of guides, including a First Aid guide.

**Safety and other guides**

Tap this button to read a selection of guides relating to your navigation device.

**Product manuals**
Hands-free calling

About hands-free calls

**Note:** Hands-free calling is not supported on all devices.

If you have a mobile phone with Bluetooth®, you can use your TomTom GPS device to make phone calls and send and receive messages.

**Important:** Not all phones are supported or compatible with all features. For more information, go to tomtom.com/phones/compatibility.

Connecting to your phone

First you must establish a connection between your mobile phone and your TomTom GPS device. Tap **Connections** in the Settings menu, then tap **Phones**. Tap **Manage phones** and select your phone when it is shown in the list.

You only need to do this once and your TomTom GPS device will remember your phone.

Tips

- Make sure that you switch on Bluetooth® on your phone.
- Make sure that your phone is set to ‘discoverable’ or ‘visible to all’.
- You may have to enter the password ‘0000’ on your phone in order to connect to your TomTom GPS device.
- To avoid having to enter ‘0000’ every time you use the phone, save your TomTom GPS device as a trusted device on your phone.
  
  For additional information about Bluetooth settings, refer to your mobile phone user guide.

Making a call

When you have established a connection between your TomTom GPS device and your mobile phone, you can use your navigation device to make hands-free calls on your mobile phone.

To make a phone call, tap the phone button in the Driving View. Then tap one of the following buttons:

- Tap **Home** to call your Home location.
  
  If you have not entered a number for your Home location this button is unavailable.
- Tap **Phone number** to enter a phone number to call.
- Tap **Point of Interest** to choose a Point of Interest (POI) to call.
  
  If your device knows the phone number of a POI, this is shown next to the POI.
- Tap **Phonebook entry** to select a contact from your phonebook.

**Note:** Your phonebook is automatically copied to your TomTom GPS device when you first establish a connection with your mobile phone.
Not all phones can transfer the phonebook to your device. For more information, go to tomtom.com/phones/compatibility.

- Tap **Recently dialed** to select from a list of people or numbers you have called recently using your device.
- Tap **Recent caller** to select from a list of people or numbers who called you recently.
  Only calls you have received on your device are saved in this list.

**Receiving a call**

When someone calls you, the caller's name and phone number are shown. Tap the screen to accept or reject the call.

**Auto-answer**

You can set your TomTom GPS device to automatically answer incoming phone calls.

To set automatic answering, tap **Connections** in the Settings menu, then tap **Phones**. Tap **Auto-answer settings**.

Select how long your device will wait before automatically answering your calls, then tap **Done**.

**Connecting more phones to your device**

You can establish connections for up to 5 mobile phones.

To add more phones, do the following.

1. Tap **Connections** in the Settings menu.
2. Tap **Phones**.
3. Tap **Manage phones**.
4. Tap **Add** and follow the instructions.

To switch between phones, tap **Manage phones**. Then tap the button for the phone you want to connect to.

**Mobile phone menu**

**Note:** Hands-free calling is not supported on all navigation devices.

| **Manage phones**          | Tap this button to manage the mobile phones that will be connected to your TomTom GPS device.  
<p>|----------------------------|You can add a profile for up to five different mobile phones. |
| <strong>Disable hands-free</strong>     | Tap this button to disable or enable hands-free calling. |</p>

**Important**: Not all phones are supported or compatible with all features.
Favourites

About Favourites
Favourites provide an easy way to select a location without the need to enter the address. They do not need to be favourite places, they can simply be seen as a collection of useful addresses.

Creating a Favourite
To create a Favourite, do the following:
1. Tap the screen to bring up the Main menu.
2. Tap Settings to open the Settings menu.
3. Tap Favourites.
4. Tap Add.
   Select the type of the Favourite by tapping one of the buttons described below:

   - **Home**
     You can set your Home location as a Favourite.
   - **Favourite**
     You cannot create a Favourite from another Favourite. This option will always be unavailable in this menu.
     To rename a Favourite, tap Favourites in the Settings menu.
   - **Street address**
     Tap this button to add a street address as a Favourite.
   - **Recent destination**
     Create a new Favourite by selecting a location from a list of your recent destinations.
   - **Landmark or POI**
     You can add a landmark or POI as a Favourite.
Tap this button to add your current location as a Favourite. For example, if you stop somewhere interesting, while you are there you can tap this button to create the Favourite.

Tap this button to create a Favourite using the Map Browser. Select the location of the Favourite using the cursor, then tap Done.

Tap this button to create a Favourite by entering latitude and longitude values.

Tap this button to select your last recorded position as your destination.

Your device suggests a name for your new Favourite. To enter a new name, there is no need to delete the suggested name, you just start typing.

Tip: It is a good idea to give your Favourite a name that is easy to remember.

Tap OK.

Your new favourite appears in the list.

After you have added two or more Favourites, and Tips are switched on, you are asked whether you make regular trips to the same locations. If you tap YES, you can enter these destinations as your favourite destinations. Every time you switch on your device, you can immediately select one of these locations as your destination. To change these destinations or select a new destination, tap Start-up in the Settings menu, then select Ask for a destination.

Using a Favourite

You can use a Favourite as a way of navigating to a place without having to enter the address. To navigate to a Favourite, do the following:

1. Tap the screen to bring up the Main menu.
2. Tap Navigate to or Drive to.
3. Tap Favourite.
4. Select a Favourite from the list.
   Your TomTom GPS device calculates the route for you.
5. When the route is calculated, tap Done.

Your device immediately starts guiding you to your destination with spoken instructions and visual instructions on the screen.
Changing the name of a Favourite

To change the name of a Favourite, do the following:

1. Tap the screen to bring up the Main menu.
2. Tap **Settings** to open the Settings menu.
3. Tap **Favourites**.
4. Tap the Favourite you want to rename.

   **Tip:** Use the left and right arrows to choose another Favourite from your list.

5. Tap **Rename**.
6. Type in the new name and then tap **Done**.
7. Tap **Done**.

Deleting a Favourite

To delete a Favourite, do the following:

1. Tap the screen to bring up the Main menu.
2. Tap **Settings** to open the Settings menu.
3. Tap **Favourites**.
4. Tap the Favourite you want to delete.

   **Tip:** Use the left and right arrows to choose another Favourite from your list.

5. Tap **Delete**.
6. Tap **Yes** to confirm the deletion.
7. Tap **Done**.
MyTomTom

About MyTomTom

MyTomTom helps you manage the contents and services of your TomTom GPS navigation device, as well as giving you access to the TomTom community. You log in to MyTomTom on the TomTom website. It is a good idea to frequently connect your navigation device to MyTomTom to ensure you always have the latest updates and maps.

**Tip:** We recommend using a broadband internet connection whenever you connect your navigation device to MyTomTom.

Setting up MyTomTom

To set up MyTomTom on your computer, do the following:

1. Connect your computer to the internet.
2. Start a browser and go to [tomtom.com/getstarted](http://tomtom.com/getstarted).
3. You may have to select your country to continue.
4. Click **Get Started**.
5. On the left hand side, click **Download MyTomTom**.
   Your browser downloads the MyTomTom support application, which you need to install on your computer in order to connect your device to MyTomTom. Follow the instructions on the screen if you are asked questions while downloading.
6. When prompted, connect your device to your computer using the USB cable. Then switch your device on.

**Important:** You should plug the USB cable directly into a USB port on your computer and not into a USB hub or USB port on a keyboard or monitor.
Once the MyTomTom support application is installed, you can access MyTomTom from the notification area on your desktop.

**Tip:** When you connect your navigation device to your computer, MyTomTom tells you if there are any updates for your device.

**MyTomTom account**

To download content and services from TomTom, you need a MyTomTom account. You can create an account when you start using MyTomTom.

**Note:** If you have more than one TomTom navigation device, you need a separate account for each device.
Customer support

Getting help to use your navigation device

You can get further help by going to tomtom.com and clicking Support. Alternatively, you can contact Customer Support as follows:

By email: support-india@tomtom.com
By phone: 1800 1234 123
For warranty information, go to tomtom.com/legal.

GPS Status

Tap this button to see the current status for GPS reception.
Important Safety Notices and Warnings

Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS)

The Global Positioning System (GPS) and Global Navigation Satellite System (GLONASS) systems are satellite-based systems that provide location and timing information around the globe. GPS is operated and controlled under the sole responsibility of the Government of the United States of America, who are responsible for its availability and accuracy. GLONASS is operated and controlled under the sole responsibility of the Government of Russia, who are responsible for its availability and accuracy. Any changes in GPS or GLONASS availability and accuracy, or in environmental conditions, may impact the operation of this device. TomTom does not accept any liability for the availability and accuracy of GPS or GLONASS.

Use with care

Use of TomTom products while driving still means that you need to drive with due care and attention.

Aircraft and hospitals

Use of devices with an antenna is prohibited on most aircraft, in many hospitals and in many other locations. This device must not be used in these environments.

Safety messages

Please read and take note of the following important safety advice:

- Check your tyre pressure regularly.
- Service your vehicle regularly.
- Medication can affect your riding or driving ability.
- Always use seat belts if available.
- Before setting off on a motorbike, fasten your helmet correctly.
- If riding a motorbike, always wear protective clothing and equipment.
- When riding a motorbike, be extra vigilant and always ride defensively.
- Don't drink and drive.
- Most accidents happen less than 5 km from home.
- Obey the rules of the road.
- Always use your turn indicators.
- Every 2 hours, take a break for at least 10 minutes.
- Keep your seat belts on.

Keep a safe distance from the vehicle in front.

Battery

This product uses a Lithium-Ion battery.
Do not use it in a humid, wet and/or corrosive environment. Do not put, store or leave your product
in or near a heat source, in a high temperature location, in strong direct sunlight, in a microwave
oven or in a pressurised container, and do not expose it to temperatures over 60°C (140°F). Failure
to follow these guidelines may cause the battery to leak acid, become hot, explode or ignite and
cause injury and/or damage. Do not pierce, open or disassemble the battery. If the battery leaks and
you come into contact with the leaked fluids, rinse thoroughly with water and seek medical
attention immediately. For safety reasons, and to prolong the lifetime of the battery, remove your
product from your vehicle when you are not driving and keep in a cool, dry place. Charging will not
occur at low (below 0°C/32°F) or high (over 45°C/113°F) temperatures.

Temperatures: Standard operation: 0°C (32°F) to 45°C (113°F); short period storage: -20°C (-4°F) to
60°C (140°F); long period storage: -20°C (-4°F) to 25°C (77°F).

Caution: risk of explosion if battery is replaced by an incorrect type.

Do not remove or attempt to remove the non-user-replaceable battery. If you have a problem with
the battery, please contact TomTom customer support.

THE BATTERY CONTAINED IN THE PRODUCT MUST BE RECYCLED OR DISPOSED OF PROPERLY
ACCORDING TO THE LOCAL LAWS AND REGULATIONS AND ALWAYS KEPT SEPARATE FROM
HOUSEHOLD WASTE. BY DOING THIS YOU WILL HELP CONSERVE THE ENVIRONMENT. USE
YOUR TOMTOM DEVICE ONLY WITH THE SUPPLIED DC POWER LEAD (CAR CHARGER/BATTERY
CABLE), AC ADAPTER (HOME CHARGER), IN AN APPROVED CRADLE OR USING THE SUPPLIED
USB CABLE TO CONNECT TO A COMPUTER FOR BATTERY CHARGING.

If your device requires a charger, please use this device with the charger provided. For replacement
chargers, go to tomtom.com for information about approved chargers for your device.

The stated battery life is a maximum possible battery life. The maximum battery life will only be
achieved under specific atmospheric conditions. The estimated maximum battery life is based on
an average usage profile.

For tips on extending the battery life, see this FAQ: tomtom.com/batterytips.

CE marking

This equipment complies with the requirements for CE marking when used in a residential, com-
mercial, vehicular or light industrial environment, achieving all the appropriate provisions of the
relevant legislation in the EU.

R&TTE directive

Hereby, TomTom declares that TomTom products and accessories are in compliance with the
essential requirements and other relevant provisions of the EU Directive 1999/5/EC. The declaration
of conformity can be found here: tomtom.com/legal.
WEEE directive

The wheelie bin symbol on the product or its packaging indicates that this product shall not be treated as household waste. In line with EU Directive 2002/96/EC for waste electrical and electronic equipment (WEEE), this electrical product must not be disposed of as unsorted municipal waste. Please dispose of this product by returning it to the point of sale or to your local municipal collection point for recycling. By doing this you will help conserve the environment.

Pacemakers

Pacemaker manufacturers recommend that a minimum of 15cm (6 inches) be maintained between a handheld wireless device and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with independent research and recommendations by Wireless Technology Research.

Guidelines for people with pacemakers

- You should ALWAYS keep the device more than 15cm (6 inches) from your pacemaker.
- You should not carry the device in a breast pocket.

Other medical devices

Please consult your physician or the manufacturer of the medical device, to determine if the operation of your wireless product may interfere with the medical device.
