

Orlaco

Specialised Camera Solutions

Expand your TomTom BRIDGE Terminal with an Orlaco compact camera

Orlaco is the specialist in camera solutions for all kind of utility vehicles, such as trucks, emergency vehicles and heavy equipment. All over the world we broaden the horizons of drivers and operators. It is Orlaco's viewpoint that optimal vision around every vehicle should be the norm. Our products provide safety, less damage, comfort and efficiency.

Orlaco has more than 25 years of expertise in house. Based in Barneveld, the Netherlands, Orlaco has designed and manufactured quality camera systems for heavy-duty use since 1989. Orlaco develops, produces and tests each camera fully in-house. Our certified vision solutions make blind spots around vehicles visible.

The solution

Expand your TomTom BRIDGE with an Orlaco compact camera. Orlaco cameras are easy to plug into the TomTom BRIDGE. Up to four analogue cameras can be connected to the navigation system through an interface. As soon as the camera is connected, the system automatically switches to video input. Both PAL and NTSC cameras can be connected and are powered through the navigation system.

The results

- Multifunctional: Integration with TomTom display
- View on blind spots around the vehicle
- Camera image options: full screen or split screen with navigation
- Rear view options: grid lines & mirrored rear view
- Settings accessible via the app on the TomTom BRIDGE

“An Orlaco camera combined with the TomTom BRIDGE offers you an all-in-one multifunctional system that provides you safety, less damage, more comfort and greater efficiency.”

Linda van Dijk, Project Manager Communications Orlaco
