Vertex

A new, user-friendly map editing tool
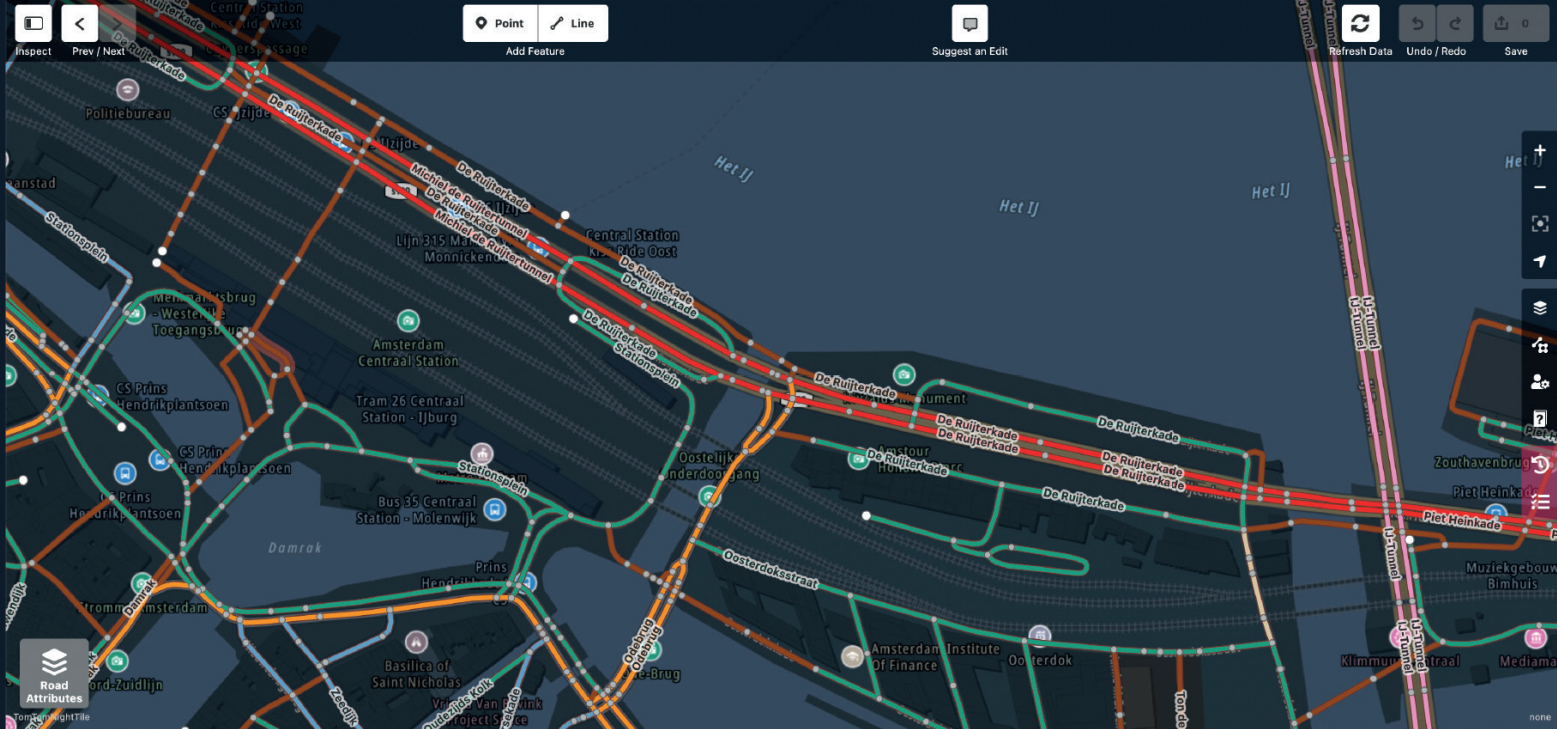

The Overview

Roads don't just move us – they're in a constant state of movement themselves.

At TomTom, keeping our maps accurate and fresh is our highest priority. That's why we created the latest addition to our map-editing arsenal: Vertex – the TomTom community map editor.Vertex is a lightweight extensible editing solution based on a popular opensourcemap editor, modified to work with TomTom's data model and incorporate our best-in-class quality checks and sources to deliver a better map. As a Vertex user, you also benefit from TomTom's world-class analysis, engineering and map editing expertise alongside a premium level of operational and technical support. It's how you get the best map possible.It's a paradigm shift in which everyone can contribute. That way everyone wins, resulting in a map you can count on, your way, every day.
