

TomTom for Vauxhall is what you need for a great journey

Pure Panel (the digital cockpit) has been introduced by the new Astra together with a fully connected navigation system created by TomTom.

The Opel Live Navigation will make sure you get a stress-free ride thanks to fully connected services and over the air map updates.

VAUXHALL

New experience on your journey

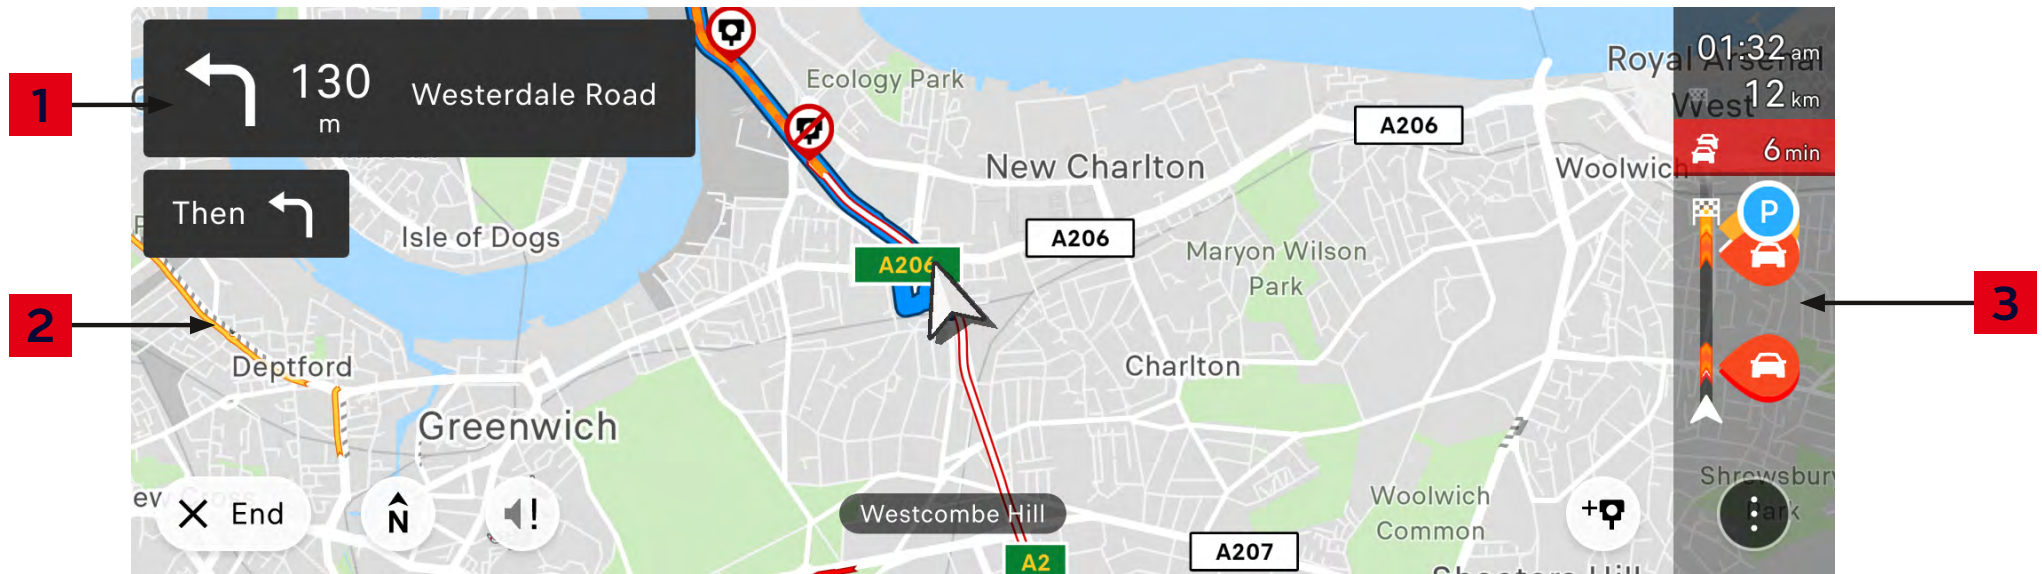

TomTom for Vauxhall

Pure Panel (the digital cockpit) has been introduced by the new Astra together with a fully connected navigation system created by TomTom.

The Opel Live Navigation will make sure you get a stress-free ride thanks to fully connected services and over the air map updates.

What's on the screen ?

1. Next instruction

It gives details of the next manoeuvre, the name of the road, and the distance to the junction. Just under, there are also brief details of the following junction.

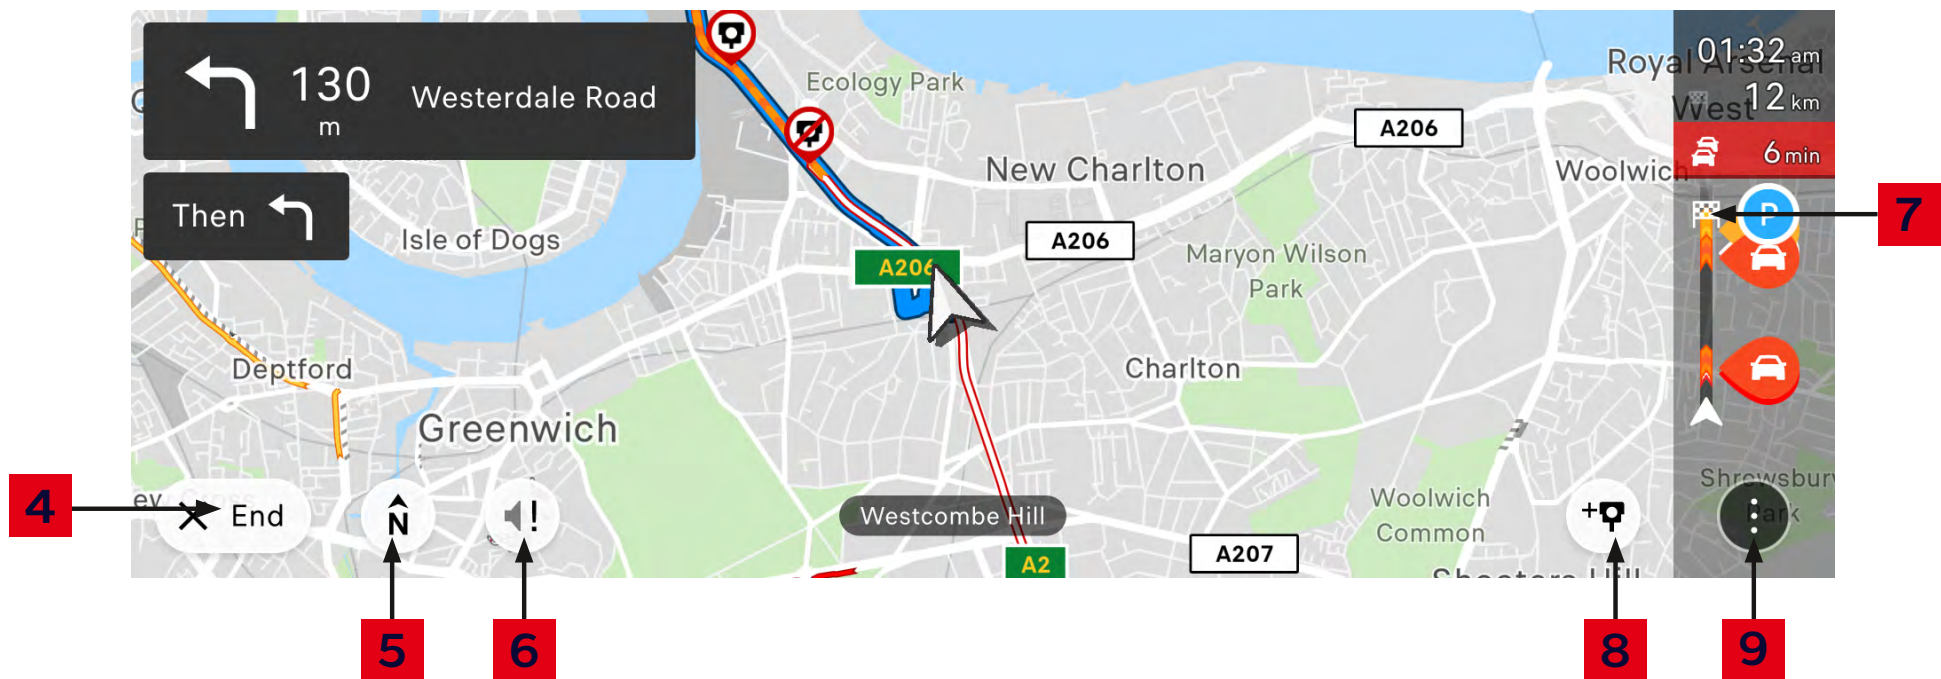

2. Traffic

Traffic jams are represented on the map by 3 different colors :

- light traffic
- moderate traffic
- high congestion

3. Route Bar

The route bar appears when a route is active. It has an arrival information panel on the top, and it also shows important information such as traffic delays, speedcams, POI's along your route. It is possible to hide the route bar in the map view.

4. End route button

Use this button to cancel your route. If you click on this button, you see a confirmation screen asking you to confirm that you want to cancel the route.

5. SWITCH VIEW BUTTON

Select the switch view button to change between the 3D, 2D direction up, 2D heading.

6. Mute button

Tap on this button to choose between all guidance instructions, alerts only or no instructions at all.

7. Final destination

This symbol shows the final destination of your current route.

8. Speedcam report

Use this button to report a speedcam on your route. If you click on the button, a pop up message will ask you to confirm the report.

9. the Options button

Click on this button to go to the route options panel, where you can modify and get an overview of your current route.

Best in class navigation

TABLE OF CONTENTS

1. Key advantages

2. Connected Navigation Pack Plus¹⁾

- TomTom Online Traffic
- TomTom Road Safety Alerts
- POIs Search
- Online Routing
- Off Street Parking
- Fuel Prices
- Charging Stations Finder 2)
- Live Weather
- Over-The-Air Map Updates
- Natural Language Voice Recognition

3. MyVauxhall App

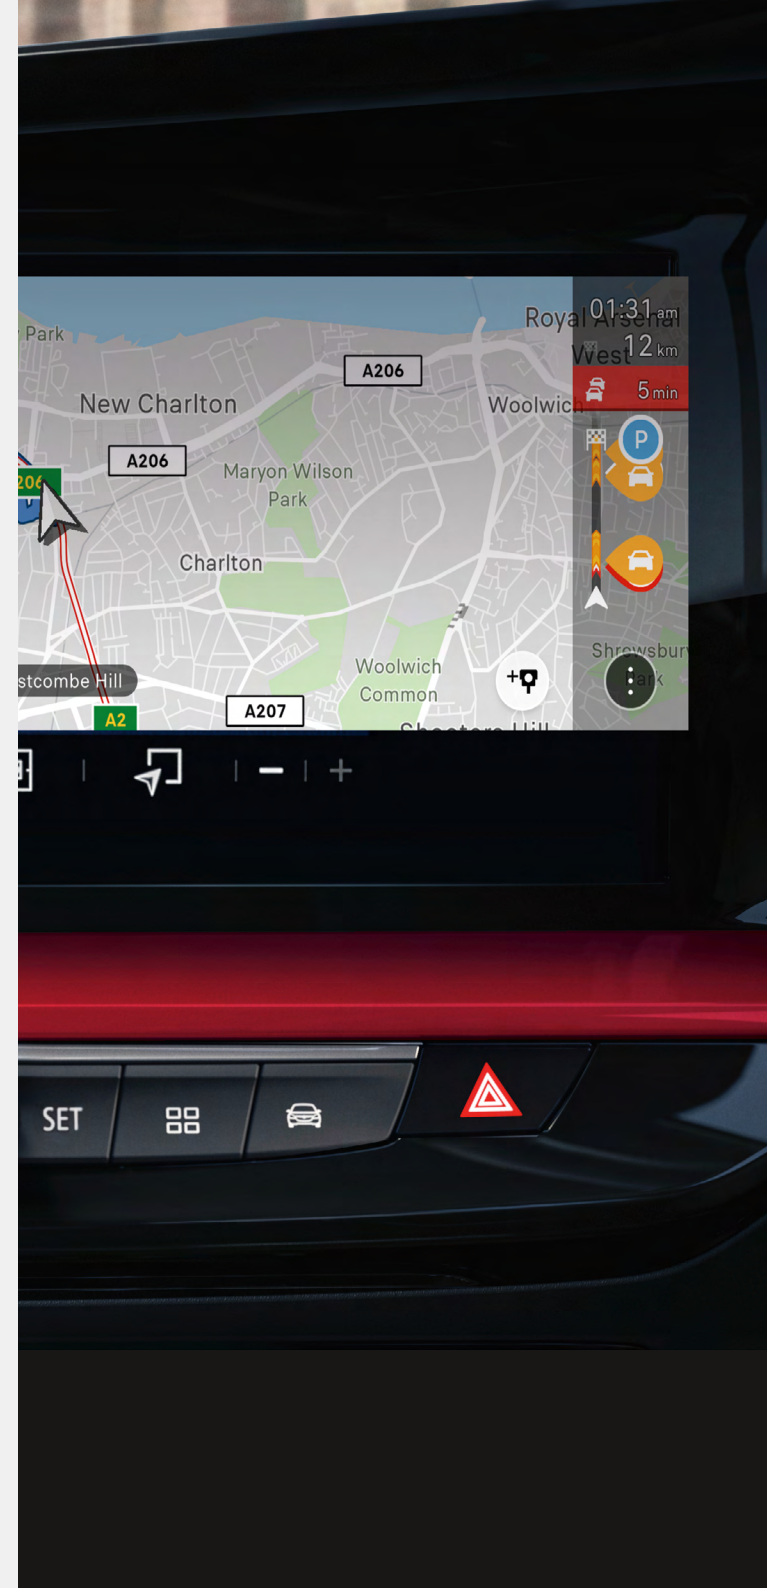

- Send destination to vehicle
- Last mile guidance

As the result of TomTom's extensive experience in user interface and navigation technology, drivers will benefit from a fully integrated system, all in a user-friendly intuitive solution that responds quickly to the driver's commands and changing driving conditions.

Connected Navigation Pack Plus is embedded in your Vauxhall navigation system during the first 3 years after your car purchase.

1) Availability may vary depending on the market

2) Depending on vehicle specification

Key advantages

1. A unique, multi-device experience

Navigation follows you on board and out of the vehicle, thanks to MyVauxhall and the Vauxhall navigation system that together offer you a seamless experience.

2. Go without worries

There is no range anxiety when you know the range of how far you can drive, even before starting your journey and what solutions are available for your trip. Unlike mobile phones, even without internet connectivity, search and routing guidance will continue working, with the system simply switching to onboard map data.

3. Everything is customizable

You can optimize the home screen to fit your needs, by adding favorite locations and different applications.

4. Cluster display visualisation

The cluster display shows Traffic hazard warnings, speed limit warning, multi-lane level guidance and turn by turn instructions.

5. User-friendly and highly responsive

Never miss an exit or a turn and always know what's ahead, with clear information and no distraction. The system automatically follows the local signage according to each country's regulations, putting you in control and at ease, no matter where you are.

6. Intuitive and predictive

Navigation supports frequent drivers by offering destination suggestions based on your travel history. Instead of repetitively having to manually enter destinations (for example, Home or Work), the navigation system suggests relevant destinations at the start of the drive. By just confirming you are going to the suggested destination, the navigation system will inform you about the time of arrival and the traffic situation on the route that you typically take to this destination.

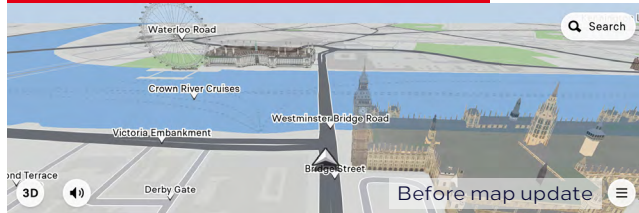

7. Navigate with voice recognition

It uses an intuitive natural language voice recognition in order to search for an address or any point of interest.. Simply say "Hey Vauxhall" or activate by push button.

Connected Navigation Pack Plus by TomTom

Connected Navigation Pack Plus provides relevant information to drivers allowing them to have a more pleasant journey.

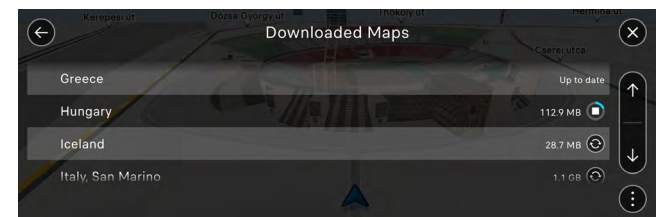

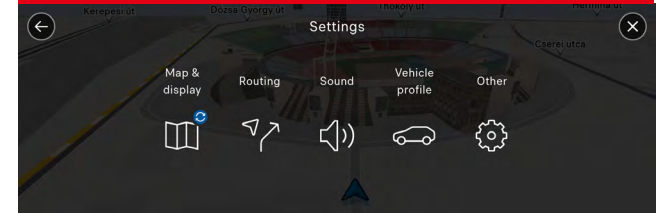

Over-the-air Map Updates

The vehicle's map of the region you drive across is continually updating through a seamless over the air connection. This ensures the system is always up-to-date and responsive, so you have to do nothing manually.

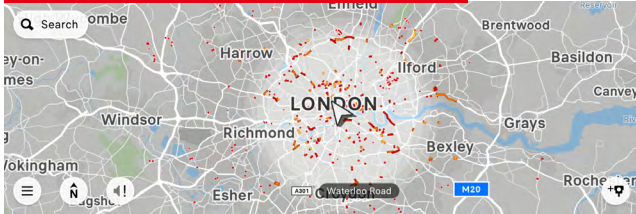

Map update over the air via WIFI® and embedded connectivity

Services for electric vehicles

Dynamic Range Mapping

There is no range anxiety when you know even before starting your journey how far your car can drive and what the solutions are for your trip.

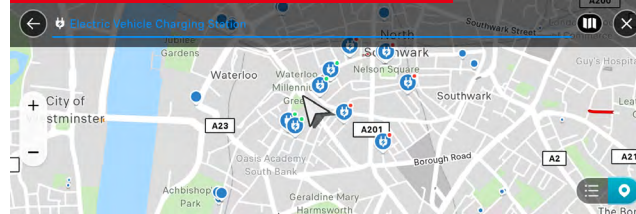

The large infotainment screen includes dynamic range mapping that visualises the vehicle's real-time range on the map, as well as the nearest charging station.

The driver will be prompted to search for an EV station if battery is running low.

**DYNAMIC
RANGE
MAPPING**

Charging Station Finder

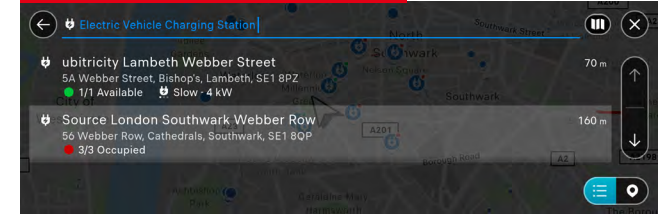

This enables EV drivers to find available locations and make informed decisions about when and where to charge. The system will prompt you automatically with a list of charging stations compatible* to your car.

- Real-time information on the EV station availability
- Flexibility to choose your preferred charging stations

*EV Services availability depends on car model.

Charging station real time availability

- Quick visualisation on EV availability:
 - unavailable
 - available
- Brand and operator names
- EV station address information, opening hours, payment method
- Along the route search, cross-border calculation

Online Traffic

TomTom Online Traffic

Updated every 30 seconds

99% of the roads covered

Large community

Traffic detected up to 100m

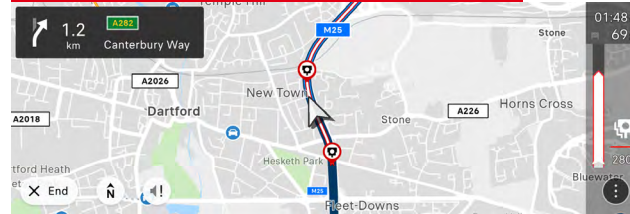

It guarantees access to the most up-to-date and accurate traffic information to help drivers arrive at their destinations faster, more safely and more reliably, regardless of their location.

The navigation system regularly receives information about the changing traffic conditions. If traffic jams, heavy rain, snow or other incidents are found on your current route, the navigation will offer to re-plan your route and avoid any delays.

ONLINE TRAFFIC BY TOMTOM

TomTom Road Safety Alerts

This feature does warn drivers about what's coming ahead, reducing stress and increasing safety.

Receive alerts that signal fixed camera zones

Receive updated alerts, sent by a unique community of drivers in Europe

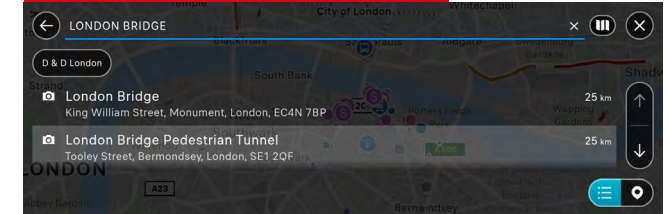

Community input, share and report real time speedcameras on your road ahead

Availability depends on country legislation

ROAD SAFETY ALERTS

Online search address and points of interests

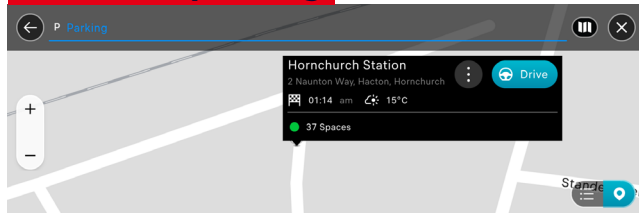

Multiple variants to search for any POI.

- Millions of useful points of interest globally
- Search by name, category or place
- Search by a nearby address, zip code or a destination
- Database is updated in real time

SEARCH

off street parking

It shows parking lot locations nearby, along your route or near your destination, including:

- Real-time availability
- Opening hours
- Available services
- Prices*

*Availability depends on the country.

Fuel prices

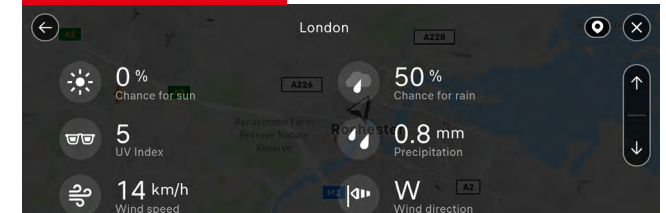

Search and display fuel stations on the road to or on the entire map.

- Information on prices, location, brand and opening hours
- Autonomy radius view on the map when low fuel

How to activate your **connected services**

OWNERS Accessories Maintenance & Repair Tyres & Parts Insurance & Warranty Offers Information & Safety

CONNECTED SERVICES

If your vehicle comes with Vauxhall Connect, you now have access to a range of services like real time traffic updates and send to phone trip planning. And, for EVs, cabin preconditioning and scheduled charging – so your Vauxhall is ready to go when you are.

1. Create an account

You can do that on 3 different platforms:

Vauxhall Connect Store

MyVauxhall web

MyVauxhall app

2. Add your vehicle by VIN number

3. Activate complementary services

See more :

<https://www.vauxhall.co.uk/>

Discover MyVauxhall app

Reaching your destination has never been so easy. You always know where your car is located, you can search for any POI (e.g. charging stations, parking places, restaurants, attractions) in MyVauxhall app and send it to your car as destination.

The service activation can be also done via this app
