

DataSmart on TomTom BRIDGE; the complete and easy ELD solution for your fleet

DataSmart ELD serves carriers in the USA and Canada to meet the new electronic monitoring mandate for commercial vehicles over 10,001 lbs. gross weight. User installed and simple to use, DataSmart ELD maintains all records of duty status (RODS) electronically. Your fleet must be compliant by December 18, 2017.

The solution

DataSmart ELD offers an FMCSA 395.20 certified solution with a full set of USA and Canadian Driver rules supporting all exemptions and exceptions. Simple to install with plug and play devices, your fleet can be ELD compliant in just hours. DataSmart ELD offers a back-office portal, Integrated DVIR management performed on the TomTom BRIDGE, on-screen violation warnings in Green, Amber and finally Red as a time limit is about to expire. IFTA Fuel Tax reporting, Workflow messaging and mobile ELD support are included.

The results

Fleets and drivers can be assured of full FMCSA § 395.20 mandatory compliance. Drivers will never again have to worry about a form and manner violation. IFTA fuel tax reporting is automated and accurate. New vehicle makes and models are supported with over the air firmware updates with cellular connectivity. Drivers records are accurate, up-to date, and legible. DataSmart ELD supports all the encryption requirements of the standard for compliance officer's to review. A roadside inspection is no longer a cause for worry. Press the "Roadside Inspection" button and the compliance officer has everything they need. FMCSA audits can be completed in hours for large fleets instead of days.

"When TomTom Bridge couples with Datasmart ELD, drivers are confident of compliance to the ELD mandate."

Michael Switzer, President of M2M Datasmart
